APPLICATION

# R180

ADD TO QUOTE

The R180 is the cost effective, easy to install and simple to use wireless wind speed indicator.

With an inbuilt relay output to trigger an external alarm, internal audible and visual operator warnings, clear LCD display, low battery warning and the ability to display the speed in various units of measurement. The RaycoWylie R180 is the answer to your wind speed indication needs.

## TECHNICAL DATA

4.69" x 3.13" x  
2.13"

-30° C to 70°

[Privacy - Terms](#)

Display Rating	IP67	Supply Voltage	10.2 to 30 Vdc
Relay Output	1 (500mA)	Accuracy	<0.2 mph for the range 11mph to 55mph
Operating Range	100m (environment dependent)	Radio Frequency	2.4 GHz

## FEATURES

- Direct Sequence spread spectrum transmission technology for an enhanced range of operation and better RFI resistance
- Internal antenna on both the display and sensor, which means low susceptibility to damage
- Selectable units MPH, KM/H, M/S
- Display and sensor pre-calibrated
- Easy installation and sensor replacement
- Uses lithium 'D' battery
- Battery life : up to 2 years ( low battery warning)
- User friendly display
- Pre-set limits with audible and visual warning
- CE compliant
