SAFEGUARD
EWP

THERE'S NO SUCH THING AS BEING HALF CRUSHED

A GLOBAL FIRST

The only system on the market to engage the worker protection function _before_ an Elevated Work Platform (EWP) incident occurs. Safeguard EWP is the latest in industrial proximity control.

WHY SAFEGUARD IS BETTER

- ✓ Safeguard EWP does not require physical contact
- ✓ State of the art sensor technology rather than physical contact protection
- ✓ Mitigate the crush & electrocution risks in your workplace
- ✓ Save on accident investigations & accidental damage
- ✓ Engineered Control
- ✓ Safer than a spotter
- ✓ Simple install, minimal downtime
- ✓ Customisable to your workplace needs
- ✓ Reduce risk
- ✓ Improve efficiency

SAFEGUARD FEATURES

3-Axis Detection

Featuring 3-axis teardrop hazard detection and 3 graduated proximity alarm settings, Safeguard EWP detects and warns the user of impending hazards before they make contact.

High Voltage Protection

High voltage powerline detection systems to prevent electrical accidents.

Interlock System

Optional wireless interlock, automatically stops the motion when safe distances are compromised. But allows EWP to move away from obstacle.

Extra Features

- Easy to operate
- Retro-fittable to all EWP's without modification
- Global safety certificates

Make Your EWP Smarter

Using ground-breaking military grade sensor technology for proximity detection & control
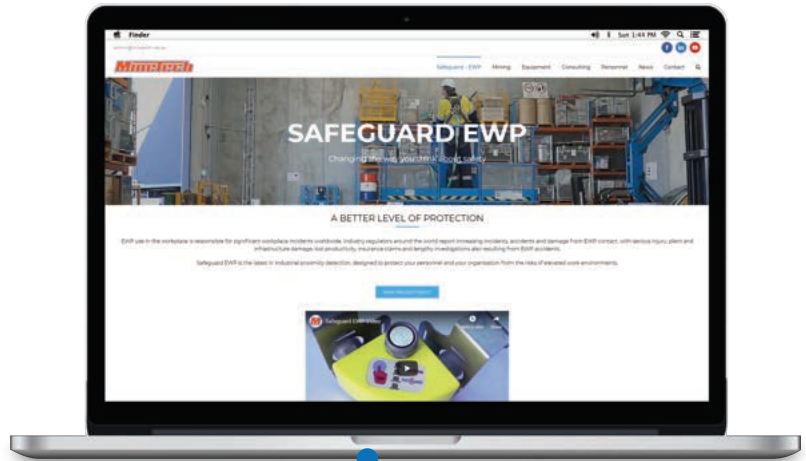

CUSTOMISE YOUR EXPERIENCE

Suit any jobs needs

Completely customisable by our technicians to suit any job or detection distance.

Quick installation

Safeguard EWP is easy to install, minimising down time and lost productivity.

INTERLOCK SYSTEM

Advanced System

Offers the highest degree of engineered protection for personnel, plant and infrastructure.

Reduce Risks

Safeguard EWP prevents collisions before impact, reducing accidents and damage.

Patent pending

The latest in Elevated Work Platform Safety

Safeguard EWP is the only Elevated Work Platform safety device on the market that engages worker protection function before an incident occurs.

Safeguard EWP is the latest in industrial proximity detection, designed to protect your personnel from the risks of elevated work environments.
