Hex Chex Wheel Nut Indicators

Hexchex are made of durable custom engineered polymer with high dimensional stability, chemical resistance, UV and thermal properties.

Australia's extreme conditions means Hexchex is exposed to high temperatures. Our material has been designed to perform over 150°C so they will not melt prematurely under heavy breaking conditions. They will melt if the hub overheats, alerting you to potential hub problems. When Hexchex melt, the non stick material is removed easily without damaging your wheels.

Hexchex are available in 4 sizes. The Multi Size design allows each product to fit a range of nuts, covering 19mm to 50mm in both metric and imperial.

					
2330	3038	3850			
Metric	Imperial	Metric	Imperial	Metric	Imperial
23mm	1	30mm	1 3/16	38mm	1 1/2
30mm	1 3/16	38mm	1 1/2	50mm	1 1/3
