Water Insecurity Solutions LLC Capability Statement

Water Insecurity Solutions LLC partners with agencies, engineering firms and community organizations to strengthen water resilience through public-health-informed planning, implementation and collaboration.

Mission:

To support resilient and equitable water systems through practical strategies that bridge public health, science, policy, and community needs.

Core Capabilities:

- Water resilience, drinking water protection, and adaptation planning
- Community coordination and partnership development
- Data-informed planning and decision support

Experience:

- Directed statewide environmental public health initiatives and data systems
- Supported drinking water protection and rural/community water resilience planning
- Contributed public-health perspectives to drought and adaptation planning
- Addressed Oregon water insecurity through research and collaboration since 2017

Differentiators:

- Public health, water and policy expertise
- Experience bridging technical and community priorities
- Strong local, state, federal, and nonprofit partnerships
- Published research on water quality and insecurity
