

## Field Trips

Given the property and space use of Island Roots programs, we are not planning for typical field trips this camp season.

Since much of our camp programming occurs on Marblehead Conservancy property located between Tioga Way and Steer Swamp, and including the Steer Swamp Conservation Area, we have the following plans in place.

### Activity Areas

Island Roots utilizes outdoor spaces around and near the building at 40 Tioga Way. We additionally use outdoor space between Tioga Way and what is known as the Steer Swamp Conservation Area, land also maintained by the Marblehead Conservancy. We have partnered with the Conservancy to use these spaces responsibly and in line with Leave No Trace outdoor ethics.

### With Each Group

At all times, counselors will be with their groups. Each group will have one Health Care Supervisor who is 18 years old or older, certified in First Aid and CPR, and has completed staff training and orientation. They will carry a Group Bag, which will have:

1. Group Roster,
2. Health Records for all campers and staff in their group, including guardian and emergency contact information,
3. Medications stored securely in the group backpack and Individual Health Care Plans (as applicable for the group),
4. First Aid Kit,
5. Written contingency plans,
6. Trail Maps, and
7. Emergency Procedures.

### Emergency Care

Because our *off-site* use is in our backyard, per se, groups will not only have with them all Emergency Procedures, they will also follow the same Emergency Procedures. The only changes will be the rally points for evacuation.

Rally Points: in case of emergency and/or evacuation from the trails, the meeting points will be:

- The cul-de-sac at the end of Stony Brook Rd
- Trailhead at Beacon St (NW)
- Trailhead at Beacon St (NE)
- Trailhead on Stony Brook Rd
- Parking lot beside 40 Tioga Way
