# About Us

“

**We revolutionise the way  
education is delivered  
and accessed.**

”

# Company Mission

## **make education immersive**

We recognise that more can be done to make learning fun and enticing. Our new metaverse will completely revolutionise the learning process and make a difference in the mindset of students in their education.

## **make education versatile**

We want students to learn how they learn best. Tailoring education to address more students' needs makes learning easier. With our metaverse, infrastructure and space will not be a limitation.

## **make education accessible**

We want to expand and target the global market so that students around the world - especially in less developed countries - have access to high quality education.

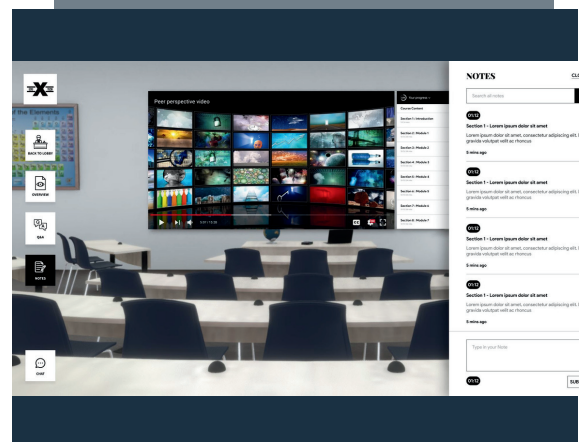

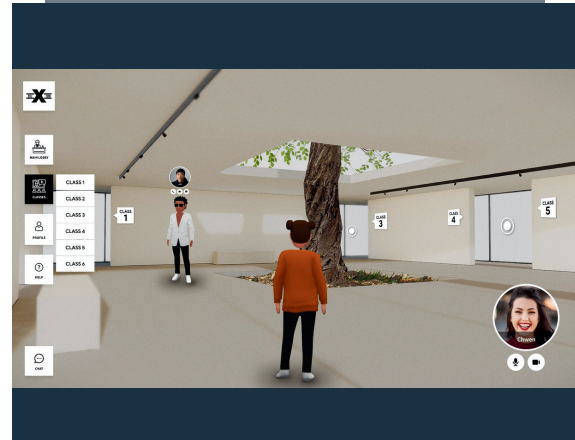

# XTV.asia

## Metaverse

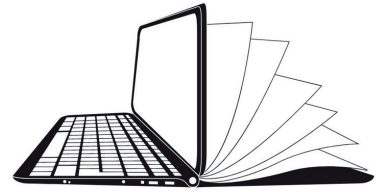

### How it functions

- It will be an Interactive Virtual classroom space.
- Students can access whatever classes they wish to take through multiple portals.
- Tuition teachers / academies can collaborate with us to have their very own classroom in our metaverse.
- Makes use of AI algorithms to identify students' preferred and most effective method of learning, to ensure education is tailored to suit students' needs.

# Our initiatives

## Edubank

A Data Bank for Education, also known as an “EduBank”, is a centralized repository of educational data. It collects, stores, and manages various types of educational information, including student records, academic performance data, curriculum materials, assessments, and other related information. Its multifaceted purposes include:

- 1. Information Management:** It helps educational institutions organize and manage their data more efficiently, allowing easy access to critical information when needed.
- 2. Decision Making:** Educators and policymakers can use the data stored in the bank to make informed decisions about curriculum development, resource allocation, and educational policies.
- 3. Research and Analysis:** Researchers and AI can access anonymized educational data from the bank to conduct studies, analyze trends, and identify areas for improvement in the education system.
- 4. Monitoring and Evaluation:** Educational authorities can use the data bank to monitor the progress of students, evaluate the effectiveness of educational programs, and assess the performance of schools and teachers.
- 5. Personalized Learning:** By leveraging the data stored in the bank, educators and AI can personalize learning experiences for students based on their individual needs, preferences, and learning styles.

Overall, EduBank plays a crucial role in supporting and advancing towards AGI.

# Our Initiatives

## Santa for Hope

"Santa for Hope" is an initiative that aims to bring hope, joy, and assistance to students and children in need. The program typically involves various activities and efforts to spread cheer and support those who may be facing challenging circumstances. Here's an elaboration on what Santa for Hope could entail:

1. **Gift Giving:** One of the primary activities of Santa for Hope is providing gifts to students and children who may not otherwise be able to afford them.
2. **Food Assistance:** In addition to gifts, Santa for Hope may also organize food drives or provide meals to students and children who are struggling with food insecurity.
3. **Community Events:** Santa for Hope may host community events and activities designed to bring people together and foster a sense of togetherness and support.
4. **Volunteer Opportunities:** The program may offer opportunities for volunteers to get involved in various ways, such as helping with gift wrapping, assisting with event planning and coordination, or participating in outreach efforts to identify and support students in need.
5. **Support Services:** In addition to tangible assistance, Santa for Hope may also offer support services such as counseling, financial assistance, or referrals to other resources for students and children facing difficult circumstances.

Overall, Santa for Hope aims to bring HOPE for those who may be struggling and provide them with the support and assistance they need to experience joy during what can be a challenging time.

## **Isabel Teo**

*Administrative Executive*

# Our Staffs

including but not limited to:

**Faris**

**Melody**

**Nadine**

# Our Student Ambassadors

including but not limited to:

(Left to right) **Ke Ren, Jia Yu, Adam, Li Rui**

# Our Features

## Collaboration

- Collaborating with numerous businesses and tuition academies in order to create relevant and high-quality course and programs.
- We will also work closely with our student ambassadors to gather feedback from students on how to improve on our curriculum.

## Registration for online courses

- We adopt **WorldID** developed by **Tools for Humanity** co-founded by **Sam Altman**, CEO and co-founder for **OpenAI**, to differentiate and verify every user's unique humanness.
- This feature keeps our online metaverse safe and eliminates deepfakes and bots.
