

How To Hide a Pandemic:

1. Cut off
access to free
tests

2. Cease developing
rapid tests that
reliably pick up the
new variants

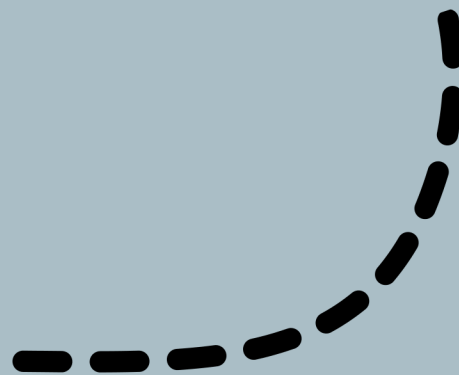

3. Let covid
positivity rates
artificially decline
due to (1) and (2)

4. Cite the new low
test-positivity
rates as a reason to
move on from covid

5. Successfully
convince people that
due to “low covid
rates” they no longer
need to test when sick.

Success!
