Downspout Disconnect Terms and Conditions

PLEASE READ CAREFULLY

The Downspout Disconnection Rebate Program (the “Program”) is offered by The Regional Municipality of Peel (the “Region”), to reduce the amount of storm water flowing into the sanitary sewer system.

In consideration of receiving the rebate under this Program, the applicant acknowledges and agrees to the following:

1. The applicant is the registered owner of the residential property identified in the application;
2. The Region may deny any application that does not meet the Program requirements, which can be found in the Program information or by calling 905-791-7800 x4409;
3. The Owner must ensure the downspout disconnections meet the following Program requirements for rebate processing by the Region of Peel:
 - a. Flow from the disconnected downspout is discharged away from the building through use of an elbow and extension which discharge to a splash pad;
 - b. Flow from the disconnected downspout does not discharge directly onto public sidewalks;
 - c. The standpipe which remains from downspout disconnection must be permanently sealed and capped to the satisfaction of the Region of Peel during verification.
4. The Owner should ensure that disconnection follows applicable municipal by-laws for completion and that the following additional recommendations for downspout disconnection have been considered:
 - a. The ground surface is graded at a minimum 2% slope away from the house or building;
 - b. Flow from disconnected downspouts does not negatively impact any neighbouring property; and
 - c. Flow from the disconnected downspouts should discharge to permeable surfaces (i.e. grass and not a driveway) to avoid creating a hazardous situation or slip and fall risks for which the applicant may be held responsible.

If these recommended criteria cannot be met then the Owner may determine it necessary to consult with a Contractor to determine alternative options for rerouting downspouts to achieve disconnection and/or downspout disconnection may not be feasible.
5. The Region, does not guarantee or warrant
 - a. Professional advice in determining the design of the downspout disconnection or eavestroughs rerouting;
 - b. That the downspout disconnection will be free of defects;
 - c. The quality of workmanship of the installation; and
 - d. The suitability of the applicant’s property for installation.
6. The applicant, and not the Region, is responsible for all costs and expenses in connection with the installation or any alterations necessary for proper downspout disconnection;

7. The applicant shall release, waive, indemnify, save and hold harmless the Region, including its respective Boards, Commissions, directors, officers, employees, agents, contractors, elected and appointed officials, and all persons for whom they are in law responsible for and their successors (collectively referred to as Regional Representatives), against all liability, loss, costs, damages, and expenses, causes of action, actions, claims, demands, lawsuits, and other proceedings, by whomever made, sustained, brought or prosecuted, including third party bodily injury, death, personal injury, and property damage, in any way based upon, occasioned by or attributable to the applicant's participation in this Program, including any negligence on the part of the Region and Regional Representatives;
8. The Region reserves the right to cancel, suspend, or alter the Program at any time or refuse, in their sole discretion, all further applications; and
9. The applicant shall refund such rebate to the Region upon request if the application form contains any material misstatement or misrepresentation or if the applicant breaches any of such terms and conditions.
