

# Coronavirus Makes People Sick

Coronavirus makes people sick.  
I don't have coronavirus, but I've  
been sick before. This is how I feel  
when I get sick...

I sneeze.

My head hurts.

My body hurts.

My nose gets stuffy.

I cough.

I feel hot.

I don't want to get sick.

I don't want to catch coronavirus from people out in the community.

So, I will keep myself healthy by staying home.
