TIP

Enzymes are naturally occurring substances and essential to the digestion, absorption and assimilation of the foods we eat every day. When our foods are cooked above 118 degrees F (47.8 degrees C) many of the naturally occurring enzymes needed to digest that very food are destroyed. Since much of our food nowadays is cooked and not eaten raw, supplementing our diet with digestive enzymes have proven to be very beneficial in supporting human health.

Digestive enzyme supplements have become so popular that global sales of this category are expected to reach \$1.6 Billion by 2025, according to recent marketing research.
