

CLEAN AIR

Filtration

What is Clean Air?

Clean air is breathable air that does not contain any harmful pollutants or toxins. Clean air does not cause allergic reactions or serious illness and supports a healthy indoor environment.

Clean air should be scent free with low levels of particles (dust), chemicals, VOC's, airborne pesticides, gases, mould spores bacteria and viruses. Clean air should just be air!

BIONIC CIMATEC FURNACE FILTRATION

The next generation electronic furnace filtration that does not reduce air flow like conventional pleated filters and does not produce ozone. A high efficiency furnace filter that removes up to 90% of airborne mould spores, VOC's, bacteria, viruses and fine dust particulate.

from \$899 - \$1,200

BIONIC AMAIRCARE CENTRAL HEPA FILTRATION

A central HEPA filtration system filters airborne particulates, VOC's as well mould spores, bacteria and viruses up to 99.97% at 0.3 microns in size. Remove harmful airborne toxins from every room of your home at at once.

from \$1,999 - \$2,499

ULTIMATE SOLUTION

Want the cleanest air possible? Install both the Bionic Cimatec Furnace Filtration System together with the Bionic Amaircare Central HEPA system and breathe pure clean air.
