Condor Country Consulting provides a range of expert cultural and natural resource services. We are a Certified Small Business Enterprise with a big passion for supporting clients to protect our natural and cultural resources. We have successfully served clients since 2001 while working with private, local, and state/federal governmental clients.

Our mission is to provide our clients with high quality natural and cultural resource products and services so that they can make informed resource management decisions. Our experienced staff will help you navigate the often complex permitting process so you can get your project done efficiently. We understand that project needs and timelines often change, and we readily adapt to those changes. Furthermore, with our community and environmental values in mind, we make sure to donate a small portion of our profits and labor to ongoing non-profit conservation programs.
