Shu Dental Laboratory, Inc.

We are a full service dental lab providing quality work since 1983. Fully equipped with the latest technology and staffed with highly skilled dental technicians. With several milling units, scanners and a 3D printer we are a full milling center.

Crown and Bridge: PFM, Zirconia, Full contour, Emax & more

Removable: Flexible, Metal Frame, Full denture, Combination & more

Implants: Scan body, Custom abutments, crown and over denture

Before

After

E.S.I.T

1.

Scan Body

2.

Remove healing cap and place scan body

3.

Take an intra oral scan of both arches and bite; or

4.

Take a rubber base impression

5.

A printed model is made along with custom abutments

6.

The crown of your choice is fabricated

7.

Finished abutment and crown for insert

It doesn't get much easier than this. In just 5 short steps you have a completed implant restoration. With ESIT we are **FAST, EASY, ACCURATE, and AFFORDABLE**. You get everything you need under one roof! No more UCLA costs, just our reusable scan body!
