## Role: Dental Clinician

Location: HA4

Salary Expectations: £85,000 per annum increasing after probation

Full Time

Notice Period: Available immediately (but with a pre-planned foreign visit for 3 weeks in March)

### GDC Registered Dental Clinician

### Professional Summary

#### Profile:

I am an experienced, competent, ambitious, hard-working and caring dentist with over 30 years of experience, treating patients with various oral health problems and needs. I am an enthusiastic and motivated individual who likes the job done to the highest possible standard. I am a great team motivator and my friendly, happy demeanour means I'm easy to work with and adaptable to new work environments. I find it easy to build a rapport with patients to develop short/medium/long term treatment plans. This usually results in patients regularly attending the practice for regular check-ups. I am reassuring and I create a fearless and trusting atmosphere for patients, especially children or anxious adults. Conservative, endodontics and prophylactic dentistry have been my strong skills.

#### Experience:

During the past twelve years I have been working in UK at private dental clinics successfully treating thousands of patients during this period and performing the following:

- Check-ups, X-rays and short- and medium-term treatment plans
- Scale and polish treatments and oral hygiene advice
- Aesthetical restorations of front and posterior teeth with composite filling
- Root canal treatments
- Removals of old root canal fillings and revisions
- Partial and full dentures
- Complicated teeth extractions
- Teeth whitening

- Training and mentoring dental nurses in the practice before their certification exams. I was the head of a private practice (Clinical Director) in Israel for two years. During this period, I reviewed and agreed with the dentists the patients' treatment plans, suggested plans' improvements and checked the post treatment X-rays after root canal treatments. During 2006 - 2010 I worked as a dental nurse waiting for my dentist qualifications to be recognized in the UK by the GDC.

In 2011 I took voluntary work in Bucharest, Romania as a dentist in a private clinic with the newest dental equipment in order to keep myself updated with the latest dental developments, materials and techniques.

I have been remarkably successful in treating children. For children older than 7 years old I used simple words and used "hand demonstrations" to explain the treatment steps to alleviate their concerns and fears. At the end of a treatment, I used to give the children small reward gifts such as stickers, balloons, etc that caused them to be happy to come again at the practice.

I have extensive (9+ years) experience using inhalation sedation with nitrous oxide. Because of my skills and success in treating children. Other dentists often referred their complicated cases to me.

### **Education:**
