The Pederson Family

Gary and Sue

Chad, Lisa, and Bricelyn

Cliff, Wyatt, Kim and Austin Olson

Welcome to our 46th annual sale. In 1961 Ralph and Helen Pederson, purchased their first Red Angus females from Beckton Stock Farm. A little over six decades have gone by but we still have the same philosophy of raising Red Angus Cattle and Quarter Horses – using balanced selection to breed and raise livestock that work on our customer’s ranches and ours. We have been fortunate to have several repeat customers who have purchased cattle from us annually since that very first sale.

We have enjoyed raising Registered Red Angus all our lives and have met many producers and made lifelong friends. We are very proud of the fact that our genetics have played a role in commercial programs that are recognized for top-selling replacement quality females and steers that push the scales to the limit. Your success is what drives us to select and produce cattle that are exceeding industry average. The Red Angus breed just keeps growing in popularity and doesn’t show any indication of slowing anytime soon. Heifers are outselling their steer mates and more and more breed associations are using Red Angus females for their crossbreeding selections. With the advancement of technology there are numerous tools to help with herd bull selection.

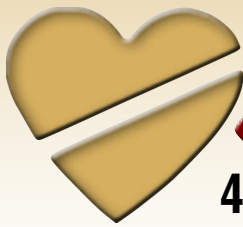

Feel free to visit with us anytime and we can use our decades of experience to answer questions that will assist you in fine tuning your herd. Our philosophy hasn’t changed any about raising cattle. “Staying consistent” and selecting for a balanced set of traits. We simply focus on females that are feminine and highly maternal with outstanding feet and leg structure and level udders. We strive to have these qualities combined with cattle that are deep sided, long bodied and have plenty of muscle wrapped up in a quiet and easy to handle package.

The bulls were weaned in the middle of October. They weaned great and did well during the cold spells and negative windchills. We will have them carcass ultrasound evaluated late February and will have Oahe Vet palpate and scrotal measure all the bulls. That information will be available through a supplement sheet sale day or on our website [www.pedersonredangus.com](http://www.pedersonredangus.com). We will not have the bulls semen tested due to their younger age, but we do stand behind them when that time arrives prior to breeding. This year, the entire offering is parent verified with GGP testing for enhanced EPDs.

We would like to thank everyone for attending and considering using our genetics in your program. Bull selection is never an easy task and feel free to ask us any questions about the bulls. We will help you select bulls with the traits that you would like to improve and help you get to your end-product goal.

*The Pederson Broken Heart Ranch crew*

## Sale Information

### DELIVERY:

It is our policy to assist in delivery to your ranch or to central locations on major highways within 300 miles. Bulls picked up within three or four days will receive a \$50 hauling refund. We will keep the bulls until April 1 at no charge but we will not be responsible for sickness or injury. However, we will keep you informed if anything turns up. We would like to start delivering bulls as soon as weather permits. We're giving a 5% discount on 5 or more bulls to the same ranch and a 10% discount for 10 bulls to the same ranch.

### HEALTH:

All cattle are on a complete vaccination program and are BQA Certified. Oahe Veterinary Clinic, (605) 845-3634, is our primary veterinarian and will also be available on sale day. None of the cattle have had creep feed.

### INSPECTION OF CATTLE:

Cattle will be available for inspection at any time prior to the sale.

### LIABILITIES:

All persons who attend the sale do so at their own risk. The owners assume no liability, legal or otherwise, for any accidents which may occur.

### BREEDING GUARANTEE:

We guarantee all bulls to be breeders although we recommend you have the bull's semen tested a couple of weeks before turn out time. If after two tests a bull is found to be a non-breeder, we will replace the bull or allow credit toward next year's sale. This guarantee is void if there is evidence of improper management in caring for the animal, or the bull's inability to breed is due to sickness or injury which was incurred after being sold. The bull shall be returned by the purchaser or other arrangements made with us. Scrotal measurements and ultra sound data on the bulls will be available on sale day. All bulls are born and raised on this ranch.

### SEMEN INTEREST:

Broken Heart Ranch is retaining a 1/3 semen interest in all bulls and selling full possession, full salvage, plus 2/3 semen revenue. This means any semen sold on any of the bulls, Broken Heart will receive 1/3 the selling price per unit. We also reserve the right to collect semen on any of the bulls, for our own use. This semen will be collected at our expense and the buyer's convenience.

### GENOMICS:

All bulls have been DNA tested and have genomically-enhanced EPDs.

BB Promotion has truly been a combination sire that we have been looking for. He has sired deep bodied, sound cattle that are both maternal and have plenty of performance. He has sired the top end of our sale lots and this year is no different. Promotion calves offer a complete balance of maternal and performance.

Red Allison Moonlight is a bull we purchased from Canada and he has not disappointed. We no longer than got off the phone after his purchase when we had interest in purchasing a share on him. His first year of breeding was quite impressive, registering 32 natural sired calves with six other bulls in the same pasture servicing around 130 cows. He sires some thick, heavy muscled calves that are very impressive to look at. We are really excited for his future here at the BHR.

Prairie Factor is a calving ease machine. We have used him for two years and have loved him for the calving ease aspect. He sires calves that can get up quick and never look back in the growth category. The maternal side of Prairie Factor goes back to the High Plains genetic line that we absolutely love on the maternal side.

# Red Angus Guide to EPDS and Indexes

**ProS...** Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

**HB .....** HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

**GM.....** GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

**CED .....** Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

**BW .....** Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

**WW .....** Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

**YW .....** Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

**ADG .....** Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

**DMI .....** Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

**MILK .....** Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

**ME .....** Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

**HPG .....** Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)
