Welcome to our 44th annual sale. In 1961, our patriarch and matriarch Ralph and Helen Pederson, purchased their first Red Angus females from Beckton Stock Farm. A little over six decades have gone by but we still have the same philosophy of raising cattle and Quarter Horses. We also have been fortunate to have repeat customers that date back to the beginning.

We have enjoyed producing registered Red Angus all our lives and have met many producers and have made lifelong friends. We are very proud of the fact that our genetics have played a role in commercial programs that are recognized for top-selling replacement-quality females and steers that push the scales to the limit. Your success is what drives us to select and produce cattle that are exceeding industry average. The Red Angus breed just keeps growing in popularity and doesn't show any indication of slowing anytime soon. Heifers are outselling their steer mates and more and more breed associations are using Red Angus females for their crossbreeding selections. With the advancement of technology, there are numerous tools to help with herd bull selection.

Feel free to visit with us anytime and we can use our decades of experience to answer questions that will assist you in fine tuning your herd. Our philosophy hasn't changed about raising cattle. "Staying consistent" and selecting for a balanced set of traits. We simply focus on females that are feminine, highly maternal, with outstanding feet and leg structure, with level udders. We strive to have these qualities combined with cattle that are deep sided, long bodied and have plenty of muscle, wrapped up in a quiet and easy-to-handle package.

2021 was an odd year for weather as we felt we were lucky in getting some timely rains compared to many others in the country. The bulls were weaned in the middle of October. They weaned great and did exceptionally well in this mild winter. We will have them carcass ultrasound evaluated late February and will have Oahe Vet palpate and scrotal measure all the bulls. That information will be available through a supplement sheet sale day or on our website www.pedersonredangus.com. We will not have the bulls semen tested due to their younger age, but we do stand behind them when that time arrives prior to breeding. This year, the entire offering is parent verified.

We would like to thank our hired man, Tim Johnson for his help through the past year. Tim is a valuable asset to our ranch and we couldn't get everything done without him.

We would like to thank everyone for attending and considering using our genetics in your program. Bull selection is never an easy task, so feel free to ask us any questions about the bulls. We will help you select bulls with the traits that you would like to improve and help you get to your end-product goal.

Sale Information

DELIVERY:

It is our policy to assist in delivery to your ranch or to central locations on major highways within 300 miles. Bulls picked up within three or four days will receive a \$50 hauling refund. We will keep the bulls until April 1 at no charge but we will not be responsible for sickness or injury. However, we will keep you informed if anything turns up. We would like to start delivering bulls as soon as weather permits. We're giving a 5% discount on 5 or more bulls to the same ranch and a 10% discount for 10 bulls to the same ranch.

HEALTH:

All cattle are on a complete vaccination program and are BQA Certified. Oahe Veterinary Clinic, (605) 845-3634, is our primary veterinarian and will also be available on sale day. None of the cattle have had creep feed.

INSPECTION OF CATTLE:

Cattle will be available for inspection at any time prior to the sale.

LIABILITIES:

All persons who attend the sale do so at their own risk. The owners assume no liability, legal or otherwise, for any accidents which may occur.

BREEDING GUARANTEE:

We guarantee all bulls to be breeders although we recommend you have the bull's semen tested a couple of weeks before turn out time. If after two tests a bull is found to be a non-breeder, we will replace the bull or allow credit toward next year's sale. This guarantee is void if there is evidence of improper management in caring for the animal, or the bull's inability to breed is due to sickness or injury which was incurred after being sold. The bull shall be returned by the purchaser or other arrangements made with us. Scrotal measurements and ultra sound data on the bulls will be available on sale day. All bulls are born and raised on this ranch.

SEMEN INTEREST:

Broken Heart Ranch is retaining a 1/3 semen interest in all bulls and selling full possession, full salvage, plus 2/3 semen revenue. This means any semen sold on any of the bulls, Broken Heart will receive 1/3 the selling price per unit. We also reserve the right to collect semen on any of the bulls, for our own use. This semen will be collected at our expense and the buyer's convenience.

RED ANGUS GUIDE TO EPDS

RedAngus.org

ProS..... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG..... Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG..... Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY..... Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB.... Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib.(Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

In Loving Memory...

Hesperus, Colorado, rancher, Brice Lee, passed away December 24, 2021, surrounded by his family at Mercy Medical Center after a valiant war with Diffuse Large B Cell Lymphoma.

Brice Fitzgerald Lee Jr. was born January 5, 1935, in Montrose, Colorado, to Brice F. Lee Sr. and Edith Forsman Lee. In 1878, Brice's great grandfather, E.L. Osborne, homesteaded outside of Montrose and was an early pioneer of the area. Grandparents Andy and Anna Forsman were early settlers in Telluride and later homesteaded near Nucla, Colorado.

Shortly after Brice's birth, the family moved to the current ranch north of Colona, along the Uncompahgre River. The ranch is currently owned and operated by Brice's nephew, Jeff Lee, and his family. Brice was proud that Jeff and his family were the third and fourth generations operating the family ranch.

Riding his horse daily to school, Brice attended first through eighth grades at Colona School. He was one of two graduates of the final graduating class of the school. He attended and graduated from Montrose High School. Brice furthered his education at Colorado A&M University, majoring in agronomy, and soil science and water conservation, and was a member of its final graduating class before becoming Colorado State University.

While attending Colorado A&M, Brice met the love of his life, his future wife, Phyllis Fiebig, of Ft. Morgan. They were married in June of 1955. After graduation, they moved to Durango in 1956. Brice was employed by the Soil Conservation Service and Phyllis was hired as the first CSU Extension Home Economist with the Southern Ute Tribe in Ignacio. This move began a lifelong love of Durango, La Plata County, and its people. During this time, Brice was a member of the Army Reserve Unit based in Durango and was proud to serve his country for six years.

In 1962, Brice and Phyllis bought the Graden Mill and Elevator. Brice loved providing feed, seed and supplies to the agricultural community of the Four Corners region, and in return buying wheat, milling it into flour to sell to local businesses and area citizens. After being recruited as a nutritionist and salesman for Ralston Purina livestock nutrition, Brice sold the mill to Farmer's Supply.

Brice and Phyllis started their beloved herd of Hereford cattle in 1964 with the purchase of two heifers from the CSU Old Fort herd. That line of Herefords is still the base of Brice's herd today. Brice was a pioneer in beef cattle production testing and was a founding member of the Four Corners Bull Test Association. In 1972, Brice and Phyllis set up their ranch south of Hesperus, and Brice began ranching full time. The ranch incorporates summer and winter ranges that utilize federal, state and private lands in Colorado and New Mexico.

Teaching, encouraging and mentoring youth and young people was important to both Brice and Phyllis. They were avid supporters of the La Plata County Fair and the La Plata County 4-H program.

Brice's desire to be active and involved in the cattle industry led him to be a long-time member of the La Plata County Cattlemen's Association, the Colorado Cattlemen's Association (CCA), the Public Lands Council (PLC) and the National Cattlemen's Beef Association (NCBA). Brice served as president of the La Plata Co. Cattlemen, CCA and the PLC. He served several terms as a committee chair with NCBA.

Water and water issues in the Four Corners and Colorado were important to Brice. He served on the Animas La Plata Board that ultimately was responsible for the construction of the Nighthorse Dam, providing water to the Southern Ute people and residents of the Dryside. Brice also served on the La Plata Water Conservancy District and while he was president, the Long Hollow Dam Project was built, and formally named the Bobby K. Taylor Dam. Local ditch issues were also central to Brice, and he served on the HH and Townsite ditch boards. Brice served nine years as a gubernatorial appointee on the Colorado Water Quality Control Commission.

Brice lived every day with a bright and optimistic outlook. He valued his neighbors and strived to be the best neighbor he could be. Brice proudly kept his rangeland and his cows in excellent condition.

Brice was preceded in death by his wife Phyllis, parents Brice F. Lee Sr. and Edith Lee, brother Jim, brother-in-law Jack Anderson, and his grandparents, and mother and father-in-law, Fred and Marie (Eisenach) Fiebig.

Brice's survivors include daughter and son-in-law Lisa and Chad Pederson, granddaughter Bricelyn, sister and brother-in-law Harriette and Dave Walter, sister Marge Anderson, and sister-in-law Renee Lee. He is also survived by seven nieces and nephews and their families, long-time friend Lynelle Brumley, and a host of wonderful neighbors and friends.

Our family would like to thank Dad's fantastic neighbors and friends for being great caretakers of Brice. We are also appreciative of the excellent medical care provided to Dad by Mercy and San Juan Cardiology, and Mercy Medical ICU Staff.

- Nicknamed Ryan, High Plains in my opinion, has a puppy-dog face and kindest soul ever.
- Heavy-muscled, easy-keeping sire that passes the same traits to his functional daughters
- Females are proving themselves as excellent producers and we are excited to use them in several different combinations in the future
