Chad & Lisa Pederson  
605-850-9878

Welcome to our 48th annual bull sale. We first bought Red Angus females from Beckton Stock Farm in 1961. Ever since then, we have grown to become a very consistent member in the Red Angus and Quarter Horse industries. Over the years, we have met many different people who have become our lifelong friends in both of our industries and are still making many more friends today. Every year, we always try to improve our cattle to bring you consistency, soundness, and honesty through our bulls. This is our main goal so that our customers are happy. Because of this main goal, we would like to thank our repeat customers that have helped us through our ups and downs over the years.

At Broken Heart Ranch, we have come up with a philosophy. We have always believed that no bull or heifer will ever be the "one". This is a belief of ours because there is always room for improvement. Some of the greatest cattle in the history of the Red Angus breed will get outdone by someone else at some point in time, whether it is in the future or in the past. Every year, we hope to have the bulls in our sale outperform the bulls the year before. This is being done by adding some new genetics through elite females and high-quality herd bulls. We are also hoping to add several new customers that will be lifelong friends.

Don't be afraid to visit us anytime to check out our bulls. We have many years of experience that will assist you in making your herd better. As many people know, we are mainly concerned about "staying consistent" and selecting cattle for a balanced set of traits. The main thing we focus on are females that are feminine and have highly maternal traits, such as having outstanding feet and leg structure, along with level udders. Combined with cattle that are deep sided, long bodied, and having plenty of muscle makes the perfect set of calves.

This set of bulls were weaned in the first part of October. Below zero-temperatures and negative-windchills have made these bulls tough. They have also pulled out of these cold spells well and look great. We will have them carcass ultrasound evaluated late February and will have Oahe Vet palpate and scrotal measure all the bulls. That information will be available through a supplement sheet on sale day or through our website at [www.pedersonredangus.com](http://www.pedersonredangus.com). Due to their younger age, we will not be semen testing the bulls before the sale. However, do stand behind them when the time comes prior to breeding. This year, all the bulls are parent verified with GGP testing for enhanced EPDs.

We would like to thank everyone for coming to our sale and considering our genetics into your program. Selecting the perfect one for your herd isn't an easy task, so feel free to ask us any questions about the bulls. We will help you select bulls with the traits that you would like to improve and help you get to your end-goal. We would also like to thank our family and friends for helping us with sale preparation as well as sale day. This couldn't be possible without help from you guys.

We aim to offer high quality affordable bulls. This offering is an extremely consistent set of bulls that are very deep in quality, from the first to last bull in the catalog. There are bulls all through the sale order that will benefit and add value to commercial program.

## Sale Information

### DELIVERY:

It is our policy to assist in delivery to your ranch or to central locations on major highways within 300 miles. Bulls picked up within three or four days will receive a \$50 hauling refund. We will keep the bulls until April 1 at no charge but we will not be responsible for sickness or injury. However, we will keep you informed if anything turns up. We would like to start delivering bulls as soon as weather permits. We're giving a 5% discount on 5 or more bulls to the same ranch and a 10% discount for 10 bulls to the same ranch.

### HEALTH:

All cattle are on a complete vaccination program and are BQA Certified. Oahe Veterinary Clinic, (605) 845-3634, is our primary veterinarian and will also be available on sale day. None of the cattle have had creep feed.

### INSPECTION OF CATTLE:

Cattle will be available for inspection at any time prior to the sale.

### LIABILITIES:

All persons who attend the sale do so at their own risk. The owners assume no liability, legal or otherwise, for any accidents which may occur.

### BREEDING GUARANTEE:

We guarantee all bulls to be breeders although we recommend you have the bull's semen tested a couple of weeks before turn out time. If after two tests a bull is found to be a non-breeder, we will replace the bull or allow credit toward next year's sale. This guarantee is void if there is evidence of improper management in caring for the animal, or the bull's inability to breed is due to sickness or injury which was incurred after being sold. The bull shall be returned by the purchaser or other arrangements made with us. Scrotal measurements and ultra sound data on the bulls will be available on sale day. All bulls are born and raised on this ranch.

### SEMEN INTEREST:

Broken Heart Ranch is retaining a 1/3 semen interest in all bulls and selling full possession, full salvage, plus 2/3 semen revenue. This means any semen sold on any of the bulls, Broken Heart will receive 1/3 the selling price per unit. We also reserve the right to collect semen on any of the bulls, for our own use. This semen will be collected at our expense and the buyer's convenience.

### GENOMICS:

All bulls have been DNA tested and have genomically-enhanced EPDs.

Hollywood has made his mark on the Red Angus Breed. He is the most expensive bull in the Red Angus Breed selling for \$400,000 in 2023. When we got the opportunity to flush him with Berwald Bonne Bel 3115 (aka Swank), we were honored to get to breed to him with our newly purchased heifer. So far, he has not disappointed us. Unfortunately, we only got 1 calf out of that cross, which is the Lot 1 in our sale, BHR Strut.

We purchased Centerfire from Pieper's in their 2023 spring sale. He has been a great addition. Centerfire has been used in every aspect of our herd from the heifers to our cows, he does it all. Centerfire adds great calving ease and carcass values to his progeny. His calves are also very clean made and stylish. This past fall, we have purchased Centerfire's mother at Pieper's Annual Fall Production Sale and are very excited to welcome her to our Broken Heart Ranch family and are thankful to have her. Every year, Centerfire's calves stick out like a sore thumb in both the bull and heifer pens. We are also very eager for our first Centerfire heifers to calve this spring.

Guidance is a quiet, good-disposition bull that we purchased from Berwald Red Angus at their 2023 production sale. His calves have always been quiet with lots of growth. This bull has a great cow family with Berwald Jaylo as his mother. So far, this bull has had many exciting calves. We are hoping that we see more from this Berwald bull.

Believe has been a wonderful addition to our herd. He has added a lot of weaning weight to these calves. As a half paternal brother to Centerfire, we have quite a bit of success with these two half brothers and their progeny taking names in the Red Angus breed. Like Centerfire, his calves are stylish and clean made. Unfortunately, Believe passed away this summer due to injury.

NSFR Freedom L4 was a purchase from Nordlund Stock Farm in 2024. This is L4's first crop of calves in our sale. So far, he has not disappointed us. Even though he hasn't had very many calves yet, all of them have impressed us. His calves have been very consistent, showing us many different traits in growth. We are very excited for these progenies and his future progeny to come.

This bull has exceptional calving ease. He is also incredibly versatile along with a lot of style. His dam, 2101, has been flushed this past fall. With all her calves that have went through the system, there has been at least 60 calves. He is also a half sibling to one of the bulls in this sale. This has been a very exciting bull that has been a big improvement for our herd.

We bought Spud's mother (aka Wedge) at the ND State Sale in 2022 as a bred heifer. This was the calf that she was expecting at the time. Wedge is just a pure sweetheart and makes everyone's hearts melt. Just like his dam, Spud was a very quiet, well-behaved calf. He is very consistent in weaning, yearling, and average daily gain traits. Not to mention that his carcass data is off the charts. When sale time rolled around, Spud was a fan favorite, even though he wasn't for sale. His progeny are limited because he has died in 2024 due to injury. Therefore, this is his only set of calves.

This bull is an ultimate powerhouse. He is very straight topped and packed with muscle. Not only does this bull have this trait, but his calves also have inherited these traits. A lot of his calves are thick made, deep bodied, and sound moving.

George is a very even calf, with low calving ease numbers and high weaning and yearling weight numbers. He also had the looks to back up his numbers with having a very even topline and having a lot of muscle. At the time, everybody at the ranch thought that George was going to be our next great herd sire. However, our plans didn't work out when George had a battle with foot rot and was limited in his first breeding season. Not to mention that his progeny are limited.

This bull is a calf of LSF Inspire, a bull we bought from Ludvigsons. Currently, he is siring moderate birth, higher growth bulls that are excelling in every field from the cow to the lot. He is also very sound footed and travels easily along the ground as well as stays in shape. Keeping this bull sure wasn't a regret.

Having some natural maternal traits that has created some excellent females in our herd. His calves consistently have the traits of moderate birth, higher growth, and amazing carcass traits. Complete daughters are wanted across the nation and have topped many different sales. We are thankful to have a son to this amazing female maker KJL/CLZB Complete.

## Buying Bulls is a Long-Term Decision

- Purchase bulls and bred females in 2026
- First calves are born in 2027
- First daughters are bred in 2028
- First daughters calve in 2029
- Last calves born in 2031
- 10-year-old daughters of this year's bulls - 2041

## Foot and Leg Scoring Reference

**CLAW SHAPE** Reference: Shape (primarily curl) and unevenness of the claw set.

**FOOT ANGLE** Reference: Strength of pastern, depth of heel and length of foot.

**REAR LEG SIDE VIEW** Reference: Angle measured at the front of the hock.

# 60th Anniversary Celebration

*Gary and Sue celebrated their 60th wedding anniversary!*

## *In Loving Memory*

*Margaret Stadel*

**June 30, 1927 – April 26, 2025**

at the Mobridge Livestock Market. She enjoyed visiting with the ranchers and often thanked and praised them for their hard work and for taking care of the animals that help feed us. She often baked pies and desserts for the Sale Barn Café. She truly loved and adored her Mobridge Livestock Market family.

Margaret took joy and delight in family and friends. She had a big heart, warm smile, and a jolly nature, and always offered words of encouragement. Everyone that met Grandma Margaret was blessed to share a piece of her life and experiences.

Margaret Leona (Ehly) Stadel was born June 30, 1927, in Isabel, South Dakota to Sophia and John Ehly and was the third of their four girls. She grew up in rural Isabel and attended school in town. Margaret and Jake Stadel were married on December 29, 1943, and made a start of their new lives together south of Firesteel. Later they moved directly south of Isabel where they raised their five children, Leslie, Suzet, Marjorie, Jack and Mark.

In 1991, Jake and Margeret, or Grandma Margaret as she was known to many people, moved to Mobridge, South Dakota, where she lived in her own home until May of 2024 when she moved into the Prairie Sunset Village.

Margaret loved music and could play piano by ear. As a young girl, she started “playing piano” by tapping on the glass windows enjoying the different sounds. She had a few lessons, but the songs just weren’t jazzy enough. After moving to Mobridge, Mary Ann Lowe took her under her wing and the two of them made beautiful music for the United Congregational Church. She blessed many with her talent and as recently as three weeks ago, played for a funeral. She was active in the UCC Church where she took part in the Women’s Group and the choir as well as playing the organ and piano for worship.

Margaret served as the substitute mail carrier for Jake when they lived in Isabel. After Jake passed away, she began to work at the café

PIE HOLLYWOOD 222

BERWALD BONNE BEL 3115 "SWANK", DAM

- One of two calves out of the cow, Berwald Bonne Bel 3115 (aka Swank), the \$60,000 heifer sold at Berwald's Annual Production Sale 2 years ago.
- This elite herd bull has a lot of style, length of body and muscle with over 4 pounds a day ADG.
- Off the chart EPDs in WW, YW, ADG, CW, REA, and GM.
- This is a select opportunity. There are many Hollywood calves out in the world today, but there is only 1 Hollywood X Swank cross.
- Don't miss this select opportunity, because it will probably never happen again.

PIE CENTERFIRE 2064

PIE TILLY 993, PGD

- Second of two calves in this sale out of Berwald Bonne Bel 3115 (aka Swank), the \$60,000 heifer sold at Berwald's Annual Production Sale two years ago.
- Consistent and even bull in both appearance and numbers.
- Lots of calving ease crossed with growth traits to make a superb Centerfire X Bonne Bel cross.
- Swank is a cow that is quickly earning her place in the Red Angus breed.

- Sure-shot heifer bull that is raised by a 14-year-old cow with perfect feet and udder.
- Don't overlook this guy, his dam has raised some Lot 1 calves in her prime production.
- We flushed 2101 this fall so you will see her progeny again in a couple of years.
- 2101 has raised 12 natural calves and has genetic influence on another 60 for us throughout her career.

- Thank you for coming to the sale.

## RED ANGUS GUIDE TO EPDS

RedAngus.org

**ProS** – Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include CED, ADG, HPG, STAY, MW, DMI, CW, MARB, REA and Fat. **Index | Dollars per Head | Higher Value**

**HB** – HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. This index is a combination of CED, CEM, WW, Milk, MW, HPG and STAY.

**Index | Dollars per Head | Higher Value**

**GM** – GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feed yard performance and carcass traits. GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. This index is a combination of ADG, CW, DMI, MARB, Fat and REA. **Index | Dollars per Head | Higher Value**

**CED** – Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. **Percent | Higher Value**

**BW** – Birth Weight predicts differences in actual birth weight of progeny. **Pounds | Lower Value**

**WW** – Weaning Weight predicts differences in 205-day weaning weight. **Pounds | Higher Value**

**YW** – Yearling Weight predicts differences in 365-day yearling weight.

**Pounds | Higher Value**

**ADG** – Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. **Pounds | Higher Value**

**DMI** – Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. **Pounds | Lower Value**

**MILK** – Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. **Pounds | Higher Value**

**ME** – Maintenance Energy predicts the difference in maintenance energy requirements. **Mcal per Month | Lower Value**

**HPG** – Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding.

**Percent | Higher Value**

**CEM** – Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. **Percent | Higher Value**

**STAY** – Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age.

**Percent | Higher Value**

**MARB** – Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. **Marbling Score Units | Higher Value**

**YG** – Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. **Yield Grade Units | Lower Value**

**CW** – Carcass Weight predicts differences in actual hot carcass weight.

**Pounds | Higher Value**

**REA** – Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. **Square Inches | Higher Value**

**FAT** – Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. **Inches | Lower Value**
