

North American Society for Oceanic History (NASOH)
Annotated Bibliography of Race, Class, Labor, Migration, and Gender
in American Maritime History

In response to the nationwide protests for racial justice that erupted following the murder of George Floyd in 2020, the NASOH advisory council committed to, among other things, developing a freely accessible annotated bibliography of race, class, labor, and gender in American maritime history. This is a work in progress to which all are encouraged to contribute corrections, annotations, and additions, whether recently published work, or older works we have simply missed. Please write Lincoln.Paine@gmail.com with any emendations you may have.

Titles followed by an ^L are recipients of a John R. Lyman Award in Maritime History.

Glenn, Myra C. *Jack Tar's Story: The Autobiographies and Memoirs of Sailors in Antebellum America*. Cambridge University Press, 2010. ¶Positions sailors' autobiographies and memoirs as major sources for understanding antebellum American masculinity and nationalism. Chapter 3 studies American perspectives of the Haitian/Spanish American Revolutions. In the former, white American sailors frequently viewed black revolutionaries with profound disgust and racialized repulsion, especially as the massacres on both sides of the conflict mounted. At the same time, the extremes of the Revolution in Haiti made Americans proud of their organized and conservative revolution. Even more, the terror posed by the sight of blacks in charge of whites put sailors all the more on their guard, lest they suffer a similar fate.

Glenn, Myra C. "The Naval Reform Campaign Against Flogging: A Case Study in Changing Attitudes Toward Corporal Punishment, 1830–1850." *American Quarterly* 35:4 (1983): 408–25. ¶Considers the campaign against flogging in the context of the abolitionist movement and the debate over free versus coerced labor.

Gourevitch, Alex. *From Slavery to the Cooperative Commonwealth: Labor and Republican Liberty in the Nineteenth Century*. Cambridge University Press, 2014. ¶This book reconstructs how a group of nineteenth-century labor reformers appropriated and radicalized the republican tradition. These "labor republicans" derived their definition of freedom from a long tradition of political theory dating back to the classical republics.

Grady, John. *Matthew Fontaine Maury, Father of Oceanography: A Biography, 1806–1873*. McFarland, 2015. ¶Chapter 13, "Grand Explorations and Manifest Destiny," gives a detailed examination of the Navy's proslavery survey of the Amazon.

Grandin, Greg. *Empire of Necessity: Slavery, Freedom, and Deception in the New World*. Picador, 2015. ¶One morning in 1805, off a remote island in the South Pacific, Captain Amasa Delano, a New England seal hunter, climbed aboard a distressed Spanish ship carrying scores of West Africans he thought were slaves. They weren't. In fact, they were performing an elaborate ruse, having risen up earlier and slaughtered most of the crew and officers. When Delano, an idealistic, anti-slavery republican, finally realized the deception—that the men and women he thought were humble slaves were actually running the ship—he rallied his crew to

respond with explosive violence. ¶Drawing on research on four continents, *The Empire of Necessity is the untold history of this extraordinary event and its bloody aftermath*. Delano's blindness that day has already inspired one masterpiece—Herman Melville's *Benito Cereno*. Now historian Greg Grandin returns to these dramatic events to paint an indelible portrait of a world in the throes of revolution, providing a new transnational history of slavery in the Americas—and capturing the clash of peoples, economies, and faiths that was the New World in the early 1800s.

Grandy, Moses, dictated to George Thompson. *Narrative of the Life of Moses Grandy, Late a Slave in the United States of America*. Oliver Johnson, 1841. <https://archive.org/details/eeff9cab-52c0-4cb5-93d3-b0d786f7dab5/mode/2up> ¶Grandy was a slave waterman and vessel pilot in North Carolina who bought his freedom twice before finally succeeding on his third attempt. He became a noted abolitionist while working in Boston-area shipyards and as a mariner. Since he was illiterate, he dictated his story, which he also planned would generate funds so he could buy his family's freedom.

Hardy, Penelope K., and Helen M. Rozwadowski. "Maury for Modern Times: Navigating a Racist Legacy in Ocean Science." *Oceanography* 33:3 (2020): 8–13. ¶ *While Matthew Fontaine Maury made significant contributions toward understanding and representing the ocean-atmosphere system and argued for increased support from both government and the public for such studies, his work, including his science, was also inextricably involved in his nation's imperialist goals. Before and after his resignation from the United States Navy to join the Confederacy during the American Civil War, Maury worked for the perpetuation and expansion of race-based slavery. We argue that oceanographers, historians, and the public need to rethink depictions of Maury that glorify his accomplishments without interrogating their darker side.*

May, Robert E. *Slavery, Race, and Conquest in the Tropics: Lincoln, Douglas, and the Future of Latin America*. Cambridge University Press, 2013. ¶*Slavery, Race, and Conquest in the Tropics challenges the way historians interpret the causes of the American Civil War. Using Abraham Lincoln and Stephen Douglas's famed rivalry as a prism, Robert E. May shows that when Lincoln and fellow Republicans opposed slavery in the West, they did so partly from evidence that slaveholders, with Douglas's assistance, planned to follow up successes in Kansas by bringing Cuba, Mexico, and Central America into the Union as slave states. A skeptic about "Manifest Destiny," Lincoln opposed the war with Mexico, condemned Americans invading Latin America, and warned that Douglas's "popular sovereignty" doctrine would unleash U.S. slaveholders throughout Latin America. This book internationalizes America's showdown over slavery, shedding new light on the Lincoln-Douglas rivalry and Lincoln's Civil War scheme to resettle freed slaves in the tropics.*

Rockman, Seth. *Scraping By: Wage Labor, Slavery, and Survival in Early Baltimore*. Johns Hopkins University Press, 2009. ¶ *Rockman breaks new ground himself in studying "low-end laborers": slaves, free blacks, European immigrants, and the native-born who struggled to*

cobble together a few days' ill-paid toil as seamstresses, stevedores, harbor dredgers, or street cleaners. His work fits within several bodies of scholarship, including recent labor history incorporating race, gender, and class perspectives, and studies of capitalism that challenge the image of the U.S. as a land of equal opportunity. The author deftly illustrates dependent workers' contributions by detailing how "casual" labor produced both Fort McHenry and the star-spangled banner that waved over its ramparts. One caveat: while Rockman highlights voiceless, poorly documented Baltimoreans, readers seldom hear their actual voices. —T. P. Johnson

Smith, Billy G. *Ship of Death: A Voyage That Changed the Atlantic World*. Yale University Press, 2013. ¶*"It is no exaggeration to say that the Hankey, a small British ship that circled the Atlantic in 1792 and 1793, transformed the history of the Atlantic world. This extraordinary book uncovers the long-forgotten story of the Hankey, from its altruistic beginnings to its disastrous end, and describes the ship's fateful impact upon people from West Africa to Philadelphia, Haiti to London. Billy G. Smith chased the story of the Hankey from archive to archive across several continents, and he now brings back to light a saga that continues to haunt the modern world. It began with a group of high-minded British colonists who planned to establish a colony free of slavery in West Africa. With the colony failing, the ship set sail for the Caribbean and then North America, carrying, as it turned out, mosquitoes infected with yellow fever. The resulting pandemic as the Hankey traveled from one port to the next was catastrophic. In the United States, tens of thousands died in Philadelphia, New York, Boston, and Charleston. The few survivors on the Hankey eventually limped back to London, hopes dashed and numbers decimated. Smith links the voyage and its deadly cargo to some of the most significant events of the era—the success of the Haitian slave revolution, Napoleon's decision to sell the Louisiana Territory, a change in the geopolitical situation of the new United States—and spins a riveting tale of unintended consequences and the legacy of slavery that will not die."*

Zabin, Serena R. *Dangerous Economies: Status and Commerce in Imperial New York*. University of Pennsylvania Press, 2011. ¶A history of New York culture and commerce in the first two thirds of the eighteenth century, when Britain was just beginning to catch up with its imperial rivals, France and Spain. In that sparsely populated city on the fringe of an empire, enslaved Africans rubbed elbows with white indentured servants while the elite strove to maintain ties with European genteel culture. The transience of the city's people, goods, and fortunes created a notably fluid society in which establishing one's own status or verifying another's was a challenge. New York's shifting imperial identity created new avenues for success but also made success harder to define and demonstrate socially. ¶ Such a mobile urban milieu was the ideal breeding ground for crime and conspiracy, which became all too evident in 1741, when thirty slaves were executed and more than seventy other people were deported after being found guilty—on dubious evidence—of plotting a revolt. This sort of violent outburst was the unforeseen but unsurprising result of the seething culture that existed at the margins of the British Empire.

Chiarappa, Michael J. "New York City's Oyster Barges: Architecture's Threshold Role along the Urban Waterfront." *Buildings & Landscapes: Journal of the Vernacular Architecture Forum* 14 (2007): 84–108. ¶Contested relations at oyster barges assumed a racial dimension when African American shuckers arrived from the South in increasing numbers after the Civil War and challenged the hegemony of union and nonunion shuckers alike.

Chiarappa, Michael J. "Working the Delaware Estuary: African American Cultural Landscapes and the Contours of Environmental Experience." *Buildings & Landscapes: Journal of the Vernacular Architecture Forum* 25:1 (2018): 64–91. ¶African American work patterns, particularly those concerned with the handling and extraction of natural resources or labor in agricultural or industrial settings, have been at the heart of efforts to better understand black environmental experience. African Americans long participated in the environmental dynamics and transformation of the region defined by the Delaware Estuary and the use of its marine resources. This legacy has been visible principally through Thomas Eakins's well-known scenes depicting African Americans working in the region's shad fisheries or guiding railbird hunters through once bountiful wild rice areas and marsh. The Delaware Estuary's reach within Philadelphia's metropolitan sphere was critically influenced by environmental experience forged in the cultural landscapes of African Americans.

Gilje, Paul A. *Free Trade and Sailors' Rights in the War of 1812*. Cambridge University Press, 2013. ¶*Free Trade was a patrician ideal while Sailors' Rights was an issue that spoke most forcefully to common maritime laborers. Both were important products of the Enlightenment, and the Revolution was fought, in part, to promote both. It was only during the War of 1812, however, that both of these separate class ideals were joined together in one catchy phrase that captured the nation's Revolutionary and Enlightenment inheritance as well as the causes for war in 1812. Gilje traces the rise and fall of each ideal, their marriage, their postwar relevance, and eventually their deaths in the post-1848 era.*

Gilje, Paul A. *Liberty on the Waterfront: American Maritime Culture in the Age of Revolution*. University of Pennsylvania Press, 2004.^L ¶*Sailors were neither proletariats nor idealized patriots. The high ideals of the age were secondary to them, for the primary meaning of liberty for sailors was highly individualized and was best embodied in the liberty to misbehave*

ashore. They were real people who were more interested in survival than ideals, and in drink than in virtue, though they were also possessed of their own protective sense of justice and fairness that often got themselves and others into trouble.

Glenn, Myra C. *Jack Tar's Story: The Autobiographies and Memoirs of Sailors in Antebellum America*. Cambridge University Press, 2010. ¶*Glenn's book positions sailors' autobiographies and memoirs as major sources for understanding antebellum American masculinity and nationalism. Chapter 3 studies American perspectives of the Haitian/Spanish American Revolutions. In the former, white American sailors frequently viewed black revolutionaries with profound disgust and racialized repulsion, especially as the massacres on both sides of the conflict mounted. At the same time, the extremes of the Revolution in Haiti made Americans proud of their organized and conservative revolution. Even more, the terror posed by the sight of blacks in charge of whites put sailors all the more on their guard, lest they suffer a similar fate.*

Lemisch, Jesse. "Jack Tar in the Streets: Merchant Seamen in the Politics of Revolutionary America." *William and Mary Quarterly* 25:3 (1968): 371–407. ¶Lemisch brought the social history movement to maritime affairs with this groundbreaking article. His work took on traditional and historic perceptions of American seamen as crass, ignorant, naturally violent, and childlike even as it challenged Samuel Eliot Morison's portrait of that class of laborers as young, adventuresome youth who took to the seas for a few seasons and then returned happily home to a prosperous future. Highlighting evidence from the pains to which patriarchs of privileged families took to prevent their sons from becoming sailors to the harsh anti-labor laws of eighteenth-century America, Lemisch painted a new portrait of the American seamen as a group of misunderstood and ill-treated laborers.

McEvoy, Arthur F. *The Fisherman's Problem: Ecology and Law in the California Fisheries, 1850–1980*. Cambridge University Press, 1990. ¶A study of the interaction among resource ecology, economic enterprise, and law in the history of the California fishing industry. It analyzes the ways in which the natural environment not only provided the raw material for economic development but played an active role in it as well. As this book shows, the natural environment has a history both independent of, and yet influenced by, classic example of 'common property' re-environmental conservation generally, as well as in the management of the fisheries of the world's rivers and oceans.

Raffety, Matthew Taylor. *The Republic Afloat: Law, Honor, and Citizenship in Maritime America*. University of Chicago Press, 2013. ¶Raffety argues that central questions of American nationality, governance, law, and identity emerged from the contested decks of antebellum American sailing ships. He looks at shipboard and maritime violence as they played out in court records to get a sense of how maritime law, state power, and the rights and protections of citizenship developed in the early republic. He sees the dynamic between shipboard violence and conflict, the courts, and law as a mutually-shaping discussion; what happened on deck ended up in court, which in turn shaped the law. The cycle came full circle when mariners and officers attempted to use the law to their advantage in disputes. He divides his book into three parts: law, honor (including masculinity) and citizenship.

Ringle, Dennis G. *Life in Mr. Lincoln’s Navy*. Naval Institute Press, 1998. ¶Ringle discusses recruitment, sustenance, service, combat, and other topics, including how the Union Navy incorporated runaway slaves into the service, which he says inspired the Army to do the same. Of course, this lead directly to Lincoln’s Emancipation Proclamation.

Rockman, Seth. *Scraping By: Wage Labor, Slavery, and Survival in early Baltimore*. Johns Hopkins University Press, 2009. ¶Rockman breaks new ground himself in studying “low-end laborers”: slaves, free blacks, European immigrants, and the native-born who struggled to cobble together a few days’ ill-paid toil as seamstresses, stevedores, harbor dredgers, or street cleaners (literally scraping by as manure collectors). His work fits within several bodies of

scholarship, including recent labor history incorporating race, gender, and class perspectives, and studies of capitalism that challenge the image of the US as a land of equal opportunity. The author deftly illustrates dependent workers' contributions by detailing how "casual" labor produced both Fort McHenry and the star-spangled banner that waved over its ramparts. One caveat: while Rockman highlights voiceless, poorly documented Baltimoreans, readers seldom hear their actual voices. —T. P. Johnson

Rouleau, Brian, "Maritime Destiny as Manifest Destiny: American Commercial Expansionism and the Idea of the Indian." *Journal of the Early Republic* 30:3 (2010): 377–411. ¶Argues that travelling sailors' perceptions of Native Americans profoundly influenced their understanding of other, non-white peoples beyond the Americas. Rouleau calls for the kind of scholarship that joins continental expansion with global maritime enterprise, seeing that they colored each other.

Rouleau, Brian. *With Sails Whitening Every Sea: Mariners and the Making of an American Maritime Empire*. Cornell University Press, 2014.¹ ¶Rouleau's book puts working-class, bluewater white sailors at the center of American foreign relations in the early nineteenth century. Rouleau argues that sailors were the citizens of America's first global age, and that their rough and tumble working-class diplomacy shaped the nation's international relations, were the eyes for their fellow, terrestrial countrymen, and (for good or ill) served as the United States' primary representatives to foreign peoples.

"'The Undesirability of Admitting Deaf Mutes': U.S. Immigration Policy and Deaf Immigrants, 1882–1924." *Sign Language Studies* 6:4 (2006): 391–415. ¶When the federal government began in the 1880s to regulate immigration, the exclusion of what were termed "defectives" was one of the primary aims. Deaf people were among the thousands of disabled immigrants turned back each year at U.S. ports as "undesirables." Stereotyped as economically dependent and as carriers of potentially defective genes, deaf immigrants were seen as a threat to the nation. The advent of immigration restriction was one aspect of a pervasive and intensified stigmatization of disability during this period, which also saw the widespread incarceration of mentally disabled people in institutions, the sterilization of the "unfit" under state eugenic laws, the suppression of sign language, and a growing tendency to exclude disabled people from social and cultural life.

In *Late Pleistocene Archaeology and Ecology in the Far Northeast*, ed. by Claudine Chapdelaine, 191–217. Texas A&M University Press, 2012. ¶*The Champlain Sea probably attracted Paleoindian groups and in the late Paleoindian period (10800–10000 ka), there was a "demonstrable shift in site preferences to waterbodies, including riverine, lacustrine, and large wetland areas." Over time, "spruce/pine parkland/boreal forest ecozone" gave way to mixed forest conditions. There was a pronounced reliance on caribou, both North American plains/tundra (Rangifer tarandus groenlandicus) and woodland caribou (Rangifer tarandus caribou). Note the distinction between the open tundra of northern Maine and the Maritimes and southern Maine/New England, with open woodland and closed boreal forests.*

Saccone, Elena. "Seafaring as a Key Element in the First Peopling of the Americas: A Perspective from the Southern Cone." *Journal of Maritime Archaeology* 15:1 (2019): 41–56. ¶*The Americas were the last continental areas to be inhabited by modern human beings. The Jesuit Father de Acosta had already proposed in 1590 that the first peopling might have involved the use of*

watercraft through the north Pacific. Today, researchers still debate whether the first inhabitants of the continent arrived from the northwest or the northeast and when this occurred. What may help answer these questions is the indirect evidence suggesting the first settlers already had a maritime culture and very likely seafaring technology.

Winterhalder, Bruce, Douglas J. Kennett, Mark N. Grote, and Jacob Bartruff. "Ideal Free Settlement of California's Northern Channel Islands." *Journal of Anthropological Archaeology* 29:4 (2010): 469–90 ¶*The prehistoric establishment and expansion of permanent settlements on the Northern Channel Islands of southern California generally follows a pattern predicted by the population ecology model, the ideal free distribution (IFD). We determine this by comparing the abundant archaeological record of these Islands against a careful quantification of habitat suitability using areal photography, satellite imagery, and field studies. We assess watershed area, length of rocky intertidal zone, length of sandy beach for plank canoe pull-outs and area of off-shore kelp beds, for 46 coastal locations. Theoretically, our results support a behavioral ecology interpretation of settlement history, human population expansion, and economic intensification in this region.*

Anderson, Douglas D., and Wanni Wibuswasdi Anderson. *Life at Swift Water Place: Alaska at the Threshold of European Contact*. University of Alaska Press, 2019. ¶A multidisciplinary study of the early contact period of Alaskan Native history that follows a major hunting and fishing Inupiaq group at a time of momentous change in their lifeways. The Amilgaqtau yaagmiut were the most powerful group in the Kobuk River area. But their status was forever transformed thanks to two major factors. They faced a food shortage prompted by the decline in caribou, one of their major foods. This was also the time when European and Asian trade items were first introduced into their traditional society. The first trade items to arrive, a decade ahead of the Europeans themselves, were glass beads and pieces of metal that the Inupiat expertly incorporated into their traditional implements. This book integrates ethnohistoric, bio-anthropological, archaeological, and oral historical analyses.

Angelbeck, Bill, Eric McLay. "The Battle at Maple Bay: The Dynamics of Coast Salish Political Organization Through Oral Histories." *Ethnohistory* 58:3 (2011): 359–92. ¶In the mid-1800s, an alliance of Coast Salish groups engaged in a maritime canoe battle against the Kwakwaka'wakw Lekwiltok at Maple Bay on Vancouver Island. This study reflects on the multivocality of twenty-one Coast Salish accounts of the battle. These oral narratives commemorate this historic event as a moment of political solidarity among the Coast Salish, who are commonly conceived as organized at the scale of the household, while revealing persistent tensions between alliance and autonomy. The stories of the battle and its aftermath provide insights into Coast Salish protocols for enacting justice and resolving conflict.

Fienup-Riordan, Ann, Marie Meade, and Alice Rearden. *Akulmiut Neqait: Fish and Food of the Akulmiut*. Alaska Calista Education and Culture, 2019. ¶"For centuries, the Akulmiut people—a Yup'ik group—have been sustained by the annual movements of whitefish. It is a food that sustains and defines them. To this day, many Akulmiut view not only their actions in the world, but their interactions with each other, as having a direct and profound effect on these fish. Not only are fish viewed as responding to human action and intention in many contexts, but the lakes and rivers fish inhabit are likewise viewed as sentient beings, with the ability to respond both positively and negatively to those who travel there. ¶This bilingual book details the lives of the Akulmiut living in the lake country west of Bethel, Alaska (on the Kuskokwim River), in the villages of Kasigluk, Nunapitchuk, and Atmautluak. Akulmiut Neqait is based in conversations recorded with the people of these villages as they talk about their uniquely

Yup'ik view of the world and how it has weathered periods of immense change in southwest Alaska. While many predicted that globalization would sound the death knoll for many distinctive traditions, these conversations show that Indigenous people all over the planet have sought to appropriate the world in their own terms."

Gamble, Lynn H. *The Chumash World at European Contact: Power, Trade, and Feasting among Complex Hunter-Gatherers*. University of California Press, 2008. ¶*When Spanish explorers and missionaries came onto Southern California's shores in 1769, they encountered the large towns and villages of the Chumash, then among the most advanced hunter-gatherer societies in the world. The Spanish were entertained and fed at lavish feasts hosted by chiefs who participated in extensive social and economic networks. In this first modern synthesis of data from the Chumash heartland, Gamble weaves together multiple sources of evidence to re-create the rich tapestry of Chumash society. Drawing from archaeology, historical documents, ethnography, and ecology, she describes daily life in the large mainland towns, focusing on Chumash culture, household organization, politics, economy, warfare, and more.*

Oberg, Michael Leroy. *The Head in Edward Nugent's Hand: Roanoke's Forgotten Indians*. University of Pennsylvania Press, 2008. ¶*This book examines Sir Walter Raleigh's plan to create an English empire in the New World as well as the attempts of native peoples to make sense of the newcomers who threatened to transform their world in frightening ways. ¶Beginning his narrative well before the English arrival, Oberg looks at the Indians who first encountered the colonists. The English intruded into a well-established Native American world at Roanoke, led by Wingina, the weroance, or leader, of the Algonquian peoples on the island. Oberg also pays close attention to how the weroance and his people understood the arrival of the English: we watch as Wingina's brother first boards Raleigh's ship, and we listen in as Wingina receives the report of its arrival. Driving the narrative is the leader's ultimate fate: Wingina is decapitated by one of Raleigh's men in the summer of 1586. ¶When the story of Roanoke is recast in an effort to understand how and why an Algonquian weroance was murdered, and with what consequences, we arrive at a more nuanced and sophisticated understanding of what happened at the dawn of English settlement in America.*

Russell, F. S. "Sheina Macalister Marshall 20 April 1806–7 April 1977." *Biographical Memoirs of Fellows of the Royal Society* 24 (November–April 1978): 369–89. ¶Marine biologist Marshall held a BSc, Glasgow University, 1919 and a DSc 1934. Worked at Millport Laboratory entire career, with stints elsewhere for specific investigations. This memorial doesn't focus on the "first woman" aspect at all, concentrates on her science, but mentions in passing her needlework, for instance. Did work in and around water, but all shore-based, including 18-month study on Great Barrier Reef.
