SHIELD PRODUCT RANGE

KEEPING PEOPLE SAFE & HEALTHY

PRODUCT OVERVIEW

THE SHIELD STORY

Our Story

Shield Sanitation began in Alès, France, where two entrepreneurial brothers got together in the workshop and created a sanitizer station which was entirely mechanical, offered simple installation and maintenance, and is successful with high usage. More than all of this, it had to be hands free.

France being known for revolutions, this certainly wasn't a bad place to start.

THE SHIELD STORY

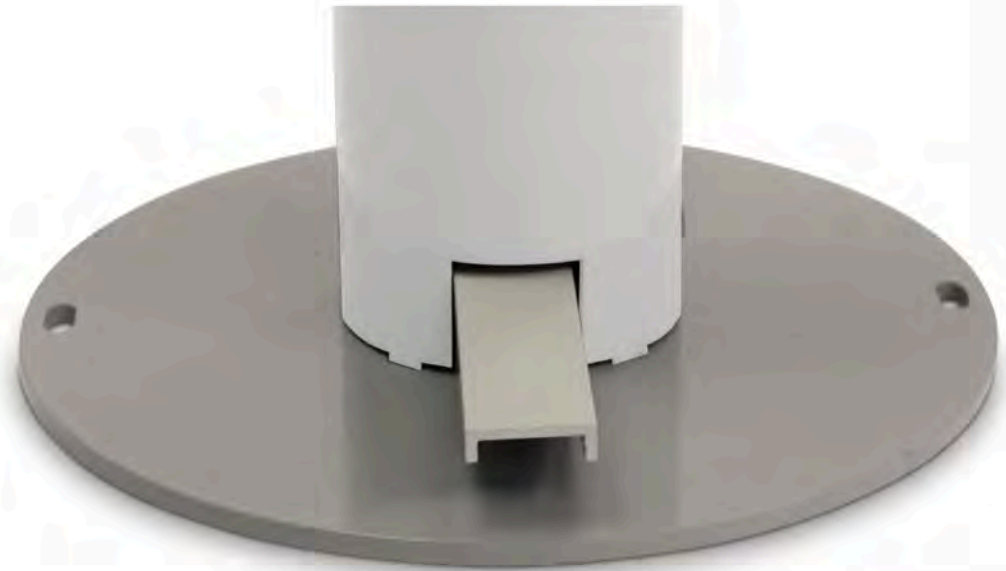

We envision that the UBTShield Sanitizer Dispenser will become a symbol of cleanliness and social responsibility, so that when a dispenser is sighted the instant reaction is to sanitize and curb the likelihood of community transmission via contamination in public spaces.

THE SHIELD STORY

Being unique, this patented solution quickly spread to the rest of Europe and UK before being taken globally including United States, Canada, Australia and New Zealand.

The operating pedal means that the human skin does not come into contact with the dispenser, eradicating the risk of cross-contamination.

UBTShield is supporting the public health of our local communities. We need to keep everyone safe.

All of us have a responsibility and this unique dispenser is the ultimate answer to reducing the spread of germs or viruses and ensuring persons are sanitizing hands at all times.

ZERO TOUCH

ZERO CONTAMINATION

Made in North America, the patented UBTShield Sanitizer Dispenser is designed to prevent contamination and remove the worry.

This no-touch dispensing station is constructed from durable powder coated aluminum with a steel base.

It is built to last and will dispense properly, every time guaranteed.

ZERO TOUCH ZERO CONTAMINATION

For optimal performance use UBTShield Hand Sanitizer Gel 946mL (32oz) with premium pump.

Also accommodates any pump top sanitizer bottle from 250ml (8oz) to 946mL (32oz), making for a great universal fit.

It's sleek contemporary design will fit well in any environment.

It functions as an independent stand, with a simple press down on the foot pedal it will dispense the sanitizer directly onto your hand.
