Massillon Richmond Foundation

10380 SW Village Center Dr #291. PSL, Florida 34987.

At the Massillon Richmond Foundation, we are deeply concerned about the social instability and political unrest shaking Haiti, a country where the collapse of governmental structures has severely undermined society.

With schools barely operational and a shortage of qualified teachers, the educational system has almost disintegrated, leaving countless children, including the students of the Massillon Foundation —at risk of being deprived of their right to education. This educational crisis not only diminishes academic performance but also jeopardizes our fundamental mission of keeping every child in school.

We are closely monitoring these developments, express our sincere gratitude to our supporters, and call on the Haitian government to respect the fundamental rights to life, freedom , and education for all.

Marie Richmond, President
