Captain Hyperscaler Announces Official Status as AKYLADE Authorized Training Partner

Captain Hyperscaler to offer AKYLADE Cyber Resilience courses as an official authorized training partner.

DETROIT – Captain Hyperscaler proudly announces their status as an AKYLADE authorized training partner. Captain Hyperscaler joins the prestigious list of authorized AKYLADE training partners.

"The NIST Cybersecurity Framework (CSF) 2.0 was release in February 2024. AKYLADE is one of the first to bring training and certification to build cyber resilience and addressing risk around this framework. Captain Hyperscaler is excited to be a part of the AKYLADE team and their mission to provide training and certification that validates your experience. Adding AKYLADE courses and certifications to the Captain Hyperscaler portfolio is important to round out our Skill Up Like a Super Hero™ training sagas," CEO Dwayne Natwick said. "We're excited to immediately bring their cyber resilience fundamentals and practitioner certifications through our virtual live instructor-led training."

AKYLADE is building an extensive list of independent, vendor-neutral, courses in cybersecurity, AI security, and risk management, starting with the Certified Cybersecurity Resilience Fundamentals (A/CCRF) and Certified Cybersecurity Resilience Practitioner (A/CCRP) training and exams. More information about the programs that they offer can be found at www.akylade.com. Regardless of the saga you choose to pave, Captain Hyperscaler's training professionals are committed to providing a personalized experience to help you Skill Up Like a Super Hero™.

"Our entire team of cybersecurity certification experts is excited to begin collaborating with Captain Hyperscaler," said Jason Dion, AKYLADE's founder and chief product officer. "Dwayne brings a different voice and excitement to the training programs that help prepare students for taking -- and passing -- our certifications. With Captain Hyperscaler's help, students who pass our tests and earn our certifications will receive a much deeper knowledge on things that other exams only give a cursory

overview of. This collaboration will help ensure that students who successfully pass our exams understand the concepts and can apply them at a much more in-depth level."

"I was very impressed with Dwayne and his Captain Hyperscaler training programs when we first met," said Alyson Laderman, AKYLADE'S chief executive officer. "The way that Captain Hyperscaler does its training is really a pathway to a successful career in cybersecurity. Not only does he train students for exams; he encourages and promotes a path to success for your career. It's not just one-and-done. Dwayne and his team are very good at showing students the bigger picture, of how different certifications work together and work in conjunction to allow you to be a much more well-rounded -- and well-skilled -- individual in your field. Essentially, with his training, he gives his students knowledge-based superpowers."

Stay tuned for more updates and training sagas as AKYLADE and Captain Hyperscaler continue to empower business and technical professionals worldwide to use, educate, develop, architect, and protect organizational risk through cyber resilience and AI security. Register for our upcoming AKYLADE workshops at https://bit.ly/AKYLADE-workshops.
