

Step 1

Mount the body on the wall where you want to install the giga mount.

Main Body

Shelf

Dowel Pin

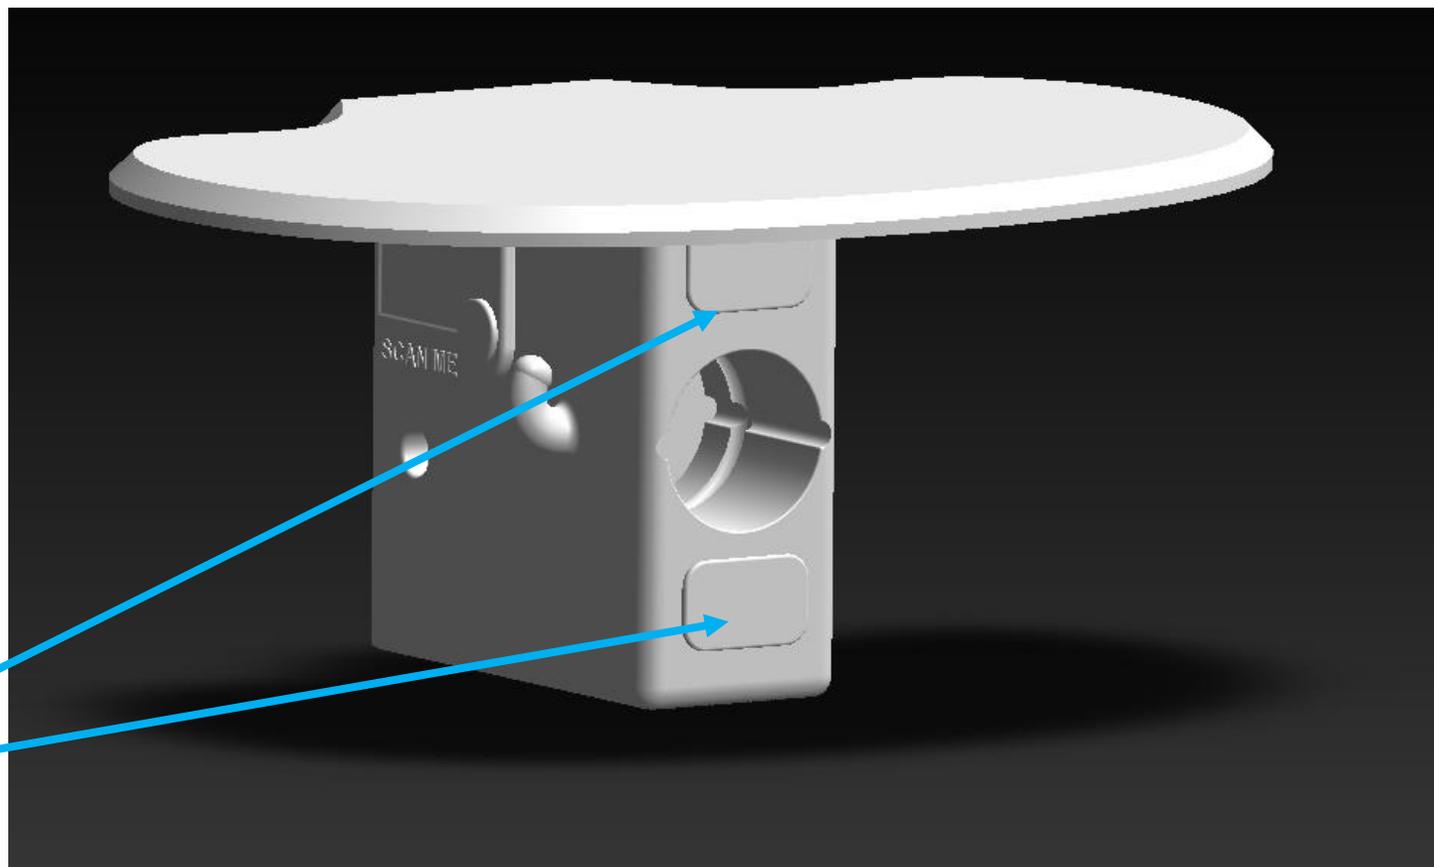

Step 2

Add the top shelf and insert the dowel pin that secures the shelf to the main body of the support.

Step 3

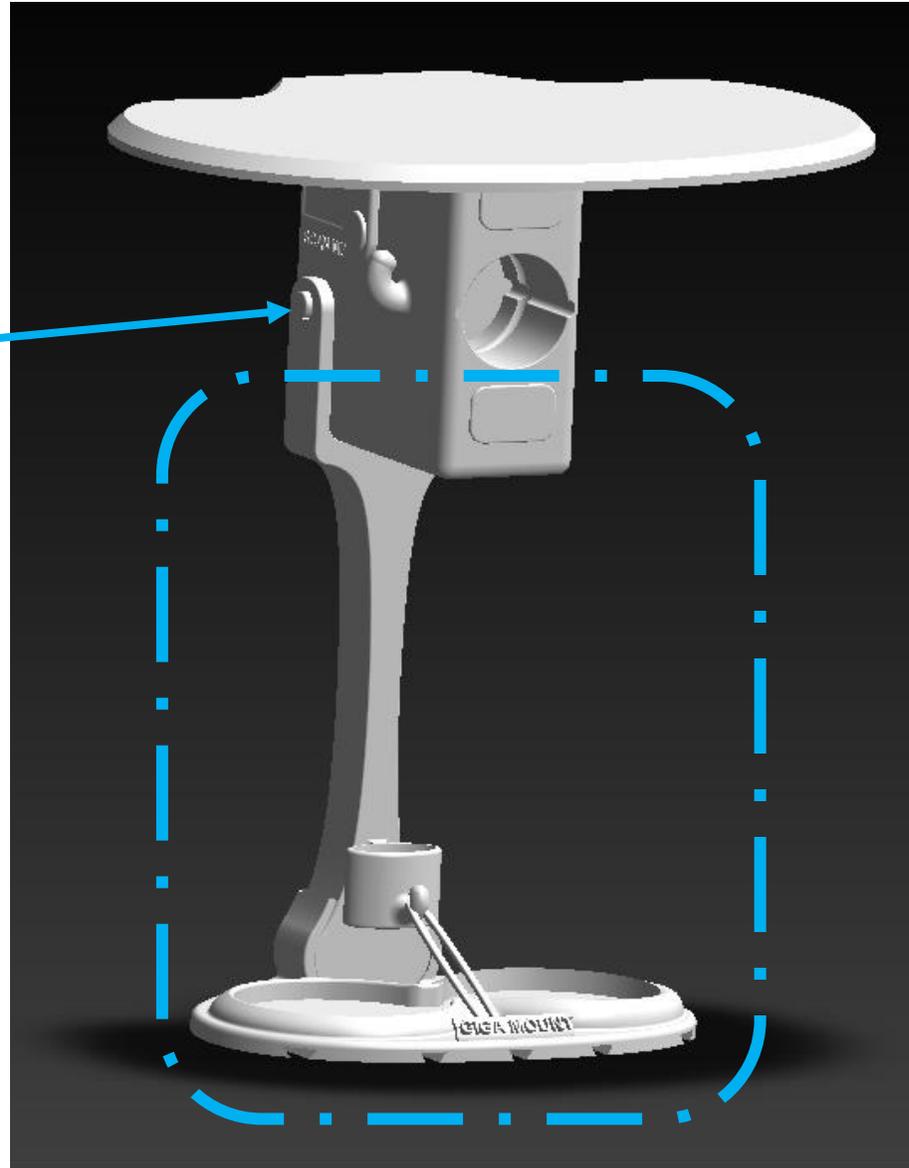

Add the screw covers

Dowel Pin

Step 4

Insert the pre-assembled cup holder module from the bottom of the mount, and secure it with the dowel pin

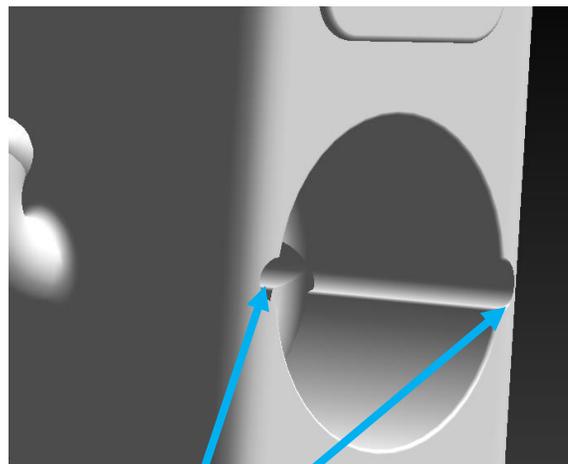

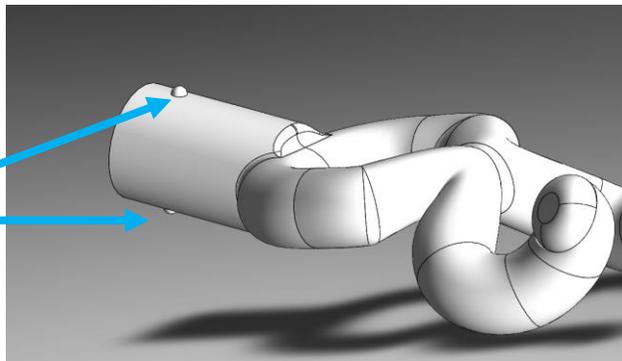

Step 5

Add the cradle into the main body's center hole.

You have to align the pins with the slots and then rotate the cradle by 90 degrees (quarter turn)
