Monthly Digest

MAY 2026

The New Era of Bookkeeping

Driven by the wave of digitalisation, technology is reshaping how accountants and **bookkeepers** work. Firms are adopting innovative **bookkeeping** software, and

accounting AI software to keep up with the pace of change. Early adopters quickly discovered that automation tools reduce errors, save time, and frees up capacity for higher-value advisory services. At the centre of this evolution are **technologies** such as cloud **accounting**, intelligent AI. ***Connected intelligence - One solution.*** Feel confident your books are set up correctly with help from a human expert and smart conversational AI.

I can set you up with reduced priced **QuickBooks** software packages today, but that's not all I offer. Ask me about training you in Quickbooks or my services in partnership with you using the software. We handle the process end to end so your small business tax filing & other bookkeeping processes are accurate and compliant.

Thanks everyone for reading, stay safe and let's watch out for each other.
