

CALL FOR PAPERS

THEME: BEHAVIORAL HEALTH AS MISSION-CRITICAL INFRASTRUCTURE

Opens May 1, 2026

Accepting Submissions

TOPICS OF INTEREST INCLUDE, BUT NOT LIMITED TO:

- Behavioral health in crewed space missions
- Counseling frameworks for long-duration and deep-space habitation
- Psychological risk modeling and human reliability in space systems
- Counselor roles within spaceflight operations, mission support, and crisis response
- Interpersonal dynamics, cohesion, and conflict in confined crews
- Ethical decision-making and relational strain in isolated environments
- Preventive counseling models and resilience-building interventions
- Translational applications of counseling theory to aerospace and safety science
- Lessons from space analogs including Antarctic stations, submarines, and HI-SEAS-type environments

Rolling Acceptance

Submissions Accepted on a Rolling Basis
