BSFL Container System Consulting + Partner Program

Build faster. Avoid failed batches. Launch with a proven operating system. Choose the level of support that saves you the most time and gets you to a working unit sooner.

DIY Support

- 4 consults
- BOM and Specs
- Best Practices

BSFL Pilot

- Everything in DIY plus...
- 2 more consults
- Full SOPs
- QC checklist

BSFL Business

- DIY + Pilot +
- We handle your buildout
- Waste sourcing
- 2-day onsite launch

Who this is for:

This service is for people, businesses, and municipalities that recognize two things:

1. There is a need or a niche to fill in organic waste management in their locality
2. That Black Soldier Fly Larvae composting offers the most cost-effective and efficient way to begin and scale local organic waste management.

Typical build-out cost

Hardware + install

- **First unit:** \$30,000–\$40,000
- **Additional units:** \$22,000–\$30,000 each

What you're really buying: time saved

- **\$5,000 (Blueprint):** save **6 mo. - 1 year** of design + trial-and-error
- **\$8,500 (Pilot Operator):** save **1 - 2 years** of optimization; target start ~90 days
- **\$12,000 (Business Launch):** save **~4 years** of business development + commissioning risk; target start ~120 days

Package Comparison

Package	Best for	What you get	Branding	Monthly support
\$5,000 — Blueprint	DIY builders who want the proven plan	3 hrs remote consulting, best practices, BOM/specs	No branding	None
\$8,500 — Operator (Partner Track)	Faster, safer launch with full SOPs	Everything in Blueprint + +2 hrs consulting (5 total), full SOPs, QC templates, vendor lists	“Future Partner of Future Acres” (public text allowed; no logo/badge)	\$199/mo per container (includes 1 hr/month)
\$12,000 — Launch (Powered by Future Acres)	Fastest path + hands-on commissioning	Everything in Operator + Future Acres handles material ordering & sourcing, 2-day onsite, local organic waste sourcing conversations, first batch launch	“Powered by Future Acres” (logo/badge allowed after install)	\$149/mo per container (includes 1 hr/month)

Branding rules

“Future Partner of Future Acres” (Pilot Operator tier)

- Public wording allowed: **yes**
- Logo/badge: **no**

“Powered by Future Acres” (Business Launch tier)

- Container/system branding: **yes**
- Optional Packaging branding: **yes**
- **“Mobile Compost Command” remains exclusive to Future Acres**

Neonate supply

If an agreement is signed, **Future Acres handles neonate supply for your operation.**

What Future Acres does NOT guarantee

- Permits, zoning, or regulatory approvals
- Specific yields/throughput, profitability, or revenue
- Feedstock availability, pricing, or supplier reliability
- Exact timelines - depends on many factors like site readiness, procurement lead times, utilities, etc.

Brand protection + revocation

Branding may be paused/removed for misrepresentation, repeated safety/compliance issues, failure to follow minimum standards, or non-payment of monthly support/neonate supply obligations.

Next step

Email compost@futureacresfarm.com with:

- Your location + site type (warehouse, farm, industrial yard, etc.)
- Target throughput (tons/week or tons/month)
- How many containers you want in year 1

I'll recommend the best package and a realistic build timeline.

Thank you for building a scalable and sustainable organic waste management system with us!

-Dave Littere, Owner of Future Acres
