2026 BALLOT MEASURES

PROP 141

VOTE YES

Protecting our Freedom to Move

Several states have already started programs to track and tax every mile driven, called a Vehicle Miles Tax or VMT. These VMTs are never as a replacement of the gas tax, rather they are additional taxes on top designed to reduce how much people are driving. It was attempted here too. Just a few years ago the Maricopa Association of Governments was considering a VMT as a "control measure" to show the federal government we are reducing emissions by taxing people out of their cars. These programs always come with invasive tracking requirements so that government won't just know how many miles you drive, but potentially where you drive too. Prop 141 prohibits all of this, ensuring Arizonans never have to worry about their government tracking or taxing their movements.

PROP 142

VOTE YES

Ending DEI and Affirmative Action

Strengthens Arizona's constitutional guarantee of equal treatment by permanently prohibiting state institutions from discriminating or granting preferences based on race or ethnicity. Prop 142 closes loopholes that have allowed race-based affirmative-action and DEI programs to persist under federal pressure. Prop 142 would end taxpayer-funded DEI offices and mandatory trainings in public education, prohibit compelled diversity statements in hiring and contracting, bar race-based disciplinary practices, and ensure students are not forced to complete DEI coursework to graduate. Prop 142 will protect merit, dignity, academic freedom, and colorblind equality regardless of changing presidential administrations or shifting federal policies.

PROP 144

VOTE YES

Fast, Accurate, Secure, Transparent Election Results

Arizona continues to be the laughingstock of the country, not finalizing election results for weeks after the election when other states know their winners that night. Also, with over 80% of voters choosing to vote by mail, the vast majority of those casting a ballot never have to show ID. Prop 144 fixes both of those problems, providing both fast and secure results. It would ensure that only US citizens can register and vote in our elections. It would ban foreign funding of our elections. It would require every voter, regardless of how they vote, to show government issued identification before casting their ballot. It would require all counties to provide voters the option of tabulating their ballot at the polling location on elections day, resulting in more voters showing ID, participating in person, and having their votes counted immediately. And it would protect our election laws from lawfare ensuring reasonable election integrity measures are safe from challenge.

2026 BALLOT MEASURES

PROP 316

VOTE YES

Capping the Grocery Tax

Arizonans are tired of the constant tax, fee, and rate hikes from local government. Local government does not have a revenue problem: they are taking more money from taxpayers than ever, but their spending appetite is insatiable. Prop 316 protects Arizona taxpayers from one potential tax hike on groceries, requiring cities to first get a vote of the people and placing a maximum of 2% on what they can collect.

PROP 317

VOTE YES

Combatting Drug Cartels

Following President Trump's designation of major cartels as foreign terrorist organizations, Prop 317 aligns Arizona with that tougher approach and directs state law enforcement to use every lawful tool available to combat them.

PROP 318

VOTE YES

Protecting Girls' Sports

Following the victory at the U.S. Supreme Court upholding states' authority to protect girls' sports, Prop 318 expands Arizona's existing protections for female athletes. It applies sex-based team designations to public and private schools and athletic associations, keeps biological boys out of girls' sports, and protects privacy in athletic restrooms, locker rooms, and showers. Prop 318 also strengthens enforcement, allowing athletes to seek relief when violations cost them opportunities or result in retaliation.

PROP 319

VOTE YES

Prop 319 – Banning Photo Radar

Protects Arizona drivers from automated surveillance and profit-driven ticketing by prohibiting new photo-radar and red-light-camera programs after 2026. Communities with existing contracts may continue only with local voter approval at the next general election and every ten years thereafter, ensuring automated traffic enforcement remains accountable to the people.

PROP 320

VOTE YES

Funding Classrooms Not Bureaucracies

Right now, Arizona school districts send just 52 cents of every dollar to classroom instruction on average. Proposition 320 puts students and teachers first by requiring covered districts to devote at least 60% of operational spending to direct instruction, gradually redirecting money from bureaucratic overhead into classrooms and enforcing accountability for noncompliance.
