DRY MOLY NC

Non-chlorinated Dry Film Lubricant

Dry Moly NC uses molybdenum disulfide to create a superior, long lasting, dry lubricating film.

Dry Moly NC withstands extreme conditions of temperature and pressure and is formulated without the use of chlorinated solvents.

FEATURE/BENEFITS:

Fortified with Molybdenum Disulfide	Stabilized, micronized dispersion of molybdenum disulfide provides effective lubrication at temperatures up to 750°F and pressure loads greater than 20,000 psi. Reduces friction and wear for metal-to-metal contact points.
Dry Film Lubrication	Convenient aerosol sprays a thin, black coating that adheres readily to most surfaces and dries within seconds without leaving an oily or tacky film which can attract dirt and dust.
Anti-Seize	Prevents galling and seizing of threaded parts.
Protective Coating	Finish adheres well to all metals, most plastics, and rubber to provide long lasting lubrication protection
Non-Chlorinated	Formulated without chlorinated solvents, which are commonly undesirable.

NOTE: Spray is extremely flammable. Do not apply in presence of possible sources of ignition of residual liquid or vapors (such as active electrical circuits, switches, running motors or flames).

APPLICATIONS:

For lubricating moving parts of all kinds, especially those subjected to high temperatures and very heavy loads, such as conveyors, bearings, high-speed gears, pump assemblies, machine tools. For lubrication of mining, farm machinery or construction equipment, particularly when dust or abrasive materials are present. Recommended for use to: Automotive Repair Facilities, Manufacturing, Metal Fabrication Shops, Equipment Repair & Rental, and Farm Machinery & Equipment

SPECIFICATIONS:

Physical Form	Aerosol (liquid)
Color	Opaque, Black
Odor	Ethereal, Solvent-like
Flammability	Extremely Flammable by CSMA Flame Extension
Shelf Life	1 Year Minimum
D.O.T. Shipping Label	ORM-D

PACKAGING:

20 fl.oz.can
