GROOVY PASTE™

Lubricant and Anti-Seize Paste

An industrial grade, anti-seize paste and lubricant for metal parts, pipes and threaded fittings in a convenient, brush top can.

FEATURES / BENEFITS :

Excellent Anti-Seize	Prevent seizing caused by galling, galvanic action, fretting, fusion, pitting, thread distortion, breakage, rust and corrosions.
Water resistant	Provides long term protection with just one application, outdoors or indoors, even in damp areas or against salt spray. Will not wash off.
Wide Temperature Range	Coating withstands temperatures of -65°F to 2100°F (-54°C to 1100°C)
Stable Coating	Will not harden or fuse to metals, cake, evaporate or separate
Compatible with many materials	Can be used as an anti-seize on the threads of steels, stainless steels, steel alloy, cast iron, aluminium, copper, brass, and titanium parts and reduces friction and wear on plastic
Environmentally Desirable	Paste contains no lead compounds traditionally found in this type of product.

APPLICATIONS:

Formulated to meet the needs of industrial machinery, construction equipment, automotive parts, marine engines, farm machinery, and other types of equipment where seizing, fretting, or galling of parts is a problem

SPECIFICATIONS:

Physical form	Viscous liquid, paste
Odor	Petroleum like
Color	Opaque, grey
Specific Gravity	1.394
Flash point (TCC)	N/A
pH	N/A
Shelf Life	1 year minimum
D.O.T Shipping Label	None

PACKAGING:

8 oz.can
1 case 12-8 oz.cans
