STAINLESS STEEL POLISH™

Aerosol Stainless Steel Polish

Formula Stainless Steel POLISH™ is a chemical blend of solvents and polishing agents especially designed for polishing and protecting stainless steel, chrome and aluminum.

FEATURES/BENEFITS:

Easy to Apply	Just spray on and wipe with a clean, dry cloth. Contains no messy abrasives or waxes to remove.
Three-in-one	Polish, protects and preserves in one easy operation.
Versatile	Can be used to polish stainless steel, chrome and aluminum.
Long-Lasting	Residual film provides a long-lasting water-resistant shield of protection. Prevents rusting, corrosion and discoloration- Does not discolor with age or repeated applications.
Economical	Ready-to-use, handy aerosol package requires no premixing or special sprayers. A small amount can clean, polish and protect a large area.
No ODC's	Contains no 1,1,1 or CFC's that contribute to ozone layer depletion.
Economical	Reduces maintenance and eliminates waste.

Note: Spray is flammable. Do not apply in presence of possible sources of ignition of residual liquid or vapors (such as active electrical circuits, switches, running motors or flames).

APPLICATIONS:

Recommended to polish and protect stainless steel and aluminum counter tops, tables, decorative trim, fixtures, drinking fountains and door frames. Do not use on cooking or eating utensils or other food contact surfaces. Used by Automatic Vending Machine Operators, Cleaning and Maintenance Services, Department Stores, Drinking Places, Equipment Rental & Leasing Services, Home Furnishing Stores, Hotels & Motels and Nursing Homes & Hospitals
