ZEPLON™

Long Lasting, Dry Film Lubricant

ZEPLON™ is a heavy duty, long lasting, dry film lubricant in an aerosol form.

This Product contains PTFE.

FEATURES/BENEFITS:

Reduces Friction	Zeplon leaves a long lasting film of micron size particles which act as "tiny ball bearings" to reduce friction and wear. Provides better lubricity than silicone or graphite based lubricants
Contains PTFE	The PTFE (polytetrafluoroethylene) is suspended in solution providing an evenly dispersed coating enhancing lubrication and reducing friction
Dry Film	The lubricating film dries quickly and does not attract dust or dirt; it is also unaffected by water, acids, alkalis, and most solvents
Excellent Release Agent	May be used as a release agent for injection molding operations; will not adversely affect post-production painting
Non-Staining & Odorless	This product does not contain any oils, waxes, or greases which may cause staining. The residual film is odorless
Versatile	Zeplon is an effective lubricant for woods, plastics, metals, glass and many other surfaces
Temperature Resistant	Zeplon will work over a wide range of temperatures from -50°F to +500°F.
No Chlorinated Solvents	The product does not contain any chlorinated solvents or ODC's (ozone depleting compounds)

NOTE: Spray and vapors are Extremely Flammable. Do not apply in the presence of possible sources of ignition such as active electrical circuits, switches, running motors or flames.

APPLICATIONS:

Zeplon lubricates hinges, locks, file drawers, doors, springs, latches, pulleys, chains and most moving parts. It eliminates material drag when cutting or sewing cloth, rubber foam or leatherette fabrics. Excellent mold release agent for rubber and plastics. Allows for painting, bonding or other surface treatments after proper cleaning. Recommended for use to Manufacturing Facilities, Machine Shops, Automotive Repair Shops, Commercial Printing, Equipment Rental & Leasing Services, New & Used Car Dealers, Nursing Homes & Hospitals, Passenger Car Rental & Leasing, Plastic Products Manufacturers, Schools & Educational Services, Textile Plants, and Warehousing & Storage

SPECIFICATIONS:

Physical Form	Aerosol (liquid)
Color	Clear, Colorless
Flammability	Extremely Flammable
Shelf Life	1 Year Minimum
D.O.T. Shipping Label	ORM-D

PACKAGING:

Aerosol - Net Weight: 11 oz. (312 g)

Cases (12 Cans)
