

## **Brazilian Blowout Aftercare**

- Although there are no restrictions on how soon you can wash your hair after a treatment, it's best if you can wait at least 48 hours.
- Minimize the frequency of washing your hair to avoid washing off the keratin layer too quickly.
- Avoid swimming in the ocean or pools. This will strip the treatment from your hair.
- Always use Brazilian Blowout shampoo and conditioner purchased from the salon. They are specifically formulated to help maintain the result of your Brazilian Blowout.
- Always practice deep conditioning your hair. Our Mask Complex is an excellent complimentary product that repairs the hair while promoting shine and guaranteeing the longest lasting smoothing treatment.
