

Popsicle stick Can Planter or pencil holder

Kit 96 makes 1 Materials

Supplied

- 20-30 popsicle sticks
- tin can
- rubber band
- jute or twine
- flowers & dirt (**not supplied**)

Instructions

1. This is done for you.
Peel the label off a tin can, wash and dry it

2. Put a rubber band around the can, making sure it's a snug fit. Place the popsicle sticks under the rubber band, pushing them together so there are no gaps.

3. Continue placing popsicle sticks underneath the rubber band all the way around the can. Depending on the size of your can, you'll need about 25 popsicle sticks to cover the whole thing.

4. Now to hide the rubber band! Tie a piece of jute or twine around the can, making sure to go around several times to cover up the rubber band and tie it up.

5. Optional Color the sticks with markers or crayons or paint them.

6. Optional - add a little bit of dirt to the bottom of the can and plant a flower in it!
