

## My Review on "Thought Elevator" by [Eric Taller](#)

For over 30 years as CEO of NLP Behavioral Consultants of NJ life Coaching and NLP Training I'm always looking for something that will add to the transformation of others.

One of my students introduced me to the "Thought Elevator" and asked me to evaluate the process. I purchased the program and started the process. Within the first week I notice personal change. Then within the next 3 weeks I accomplished 1 of my monthly financial goals.

I was impressed, in fact so impressed, I'm marketing the program on my websites, to clients and distributors. The concern of marketing the product on my websites, without authorization, was a violation of the FTC. The only way around this issue was to become an affiliate.

NOW..... let me give you an overview of the "Thought Elevator" so you can understand why I was impressed.

*The "Thought Elevator" utilizes 4 components:*

1. NLP: The handbook for the brain. How to change your thoughts, behaviors and beliefs that stop you from obtaining your personal / professional goals.
2. The Principles of manifestation, "The Secret."
3. Calm the internal thinking by guiding the mind to go into the relaxing theta state.
4. Each MP3 file has different subliminal affirmations embedded for specific outcomes.

### THE PROCESS is Simple
