

PROJECT MANAGER

On behalf of our client, Allied Blower and Sheet Metal, we are searching for a Project Manager to join their team in one of its branches in Western Canada. Since 1974, Allied Blower has gained a solid reputation as a leading air system expert in Canada. They supply dust and particulate extraction and pneumatic conveying systems for industrial applications. They offer a wide range of products and services and turnkey systems with proven technology. Allied Blower works with its customers and technology suppliers to find the best solution for specific requirements and develop solutions through close collaboration with engineering services, extensive manufacturing capabilities, and local installation. Allied Blower currently operates six branches, including one in the U.S.

Reporting to the Regional Manager, the Project Manager will work closely with customers to identify business needs and opportunities, while also interfacing with internal team members to ensure accurate estimates, technical efficacy, and the on-time/on-budget completion of projects. The Project Manager is a vital member of the team responsible for delivering projects of varying size and complexity, with the responsibility to oversee the successful completion of projects. This role will participate in the identification of opportunities, project planning, scheduling, organizing, and controlling delivery activities, and ongoing reporting.

Key Responsibilities:

- Work closely with Allied Blower customers
- Develop estimates and quotations
- Manage projects for cost, schedule and specification through work break down structure methodology
- Perform field measurements and create sketches to convey information to technical support
- Manage field operations
- Review of Daily Hazard Assessments for completeness and correctness
- Ensure the safety of all employees on projects you are responsible for
- Ensuring timely completion of the project
- Other tasks assigned by Regional Manager, as needed

Skills & Qualifications:

- 5+ years of Project Management experience, preferably within air systems or similar industries
- Mechanical Engineering diploma preferred, PMP designation an asset
- Effective customer service as well as verbal and written communication skills.
- Proficiency with MS Office applications; AutoCAD is an asset.
- Demonstrated coordination, organizational, interpersonal, and time management skills.
- Strong understanding of engineering contractors, suppliers, and manufacturers.
- Improvement oriented and focused on identifying business operating efficiencies.
- Proven ability to develop strong relationships based on trust and integrity.
- Ability and willingness to support Allied with occasional travel.

If you are interested in learning more about this opportunity, please forward your resume to aj.beaudry@clearchoicehr.ca or call 250.585.6306. We thank all candidates for their interest however only those selected for an interview will be contacted.
