

Features & Benefits

Visual Application Bands

Allow quick and easy interpretation of product for application.

Allow fast visual inspection of un-pressed material.

Application Printing and Color Mark

Permanent application printing directly on the fitting creates easy visual inspection for the life of the application for H2O and GAS.

Permanent application color markings allow visual inspection for H2O Green EPDM water applications and GAS Yellow HNBR applications.

Constant Wall thickness on all products

Manufactured to the highest standards to ensure consistent wall thickness on all materials.

Leak before press system

4 Path LBP system offers the most accurate testing results without compromising the integrity of the fitting.

Most comprehensive / complete system on the market to market leader.

CopperPress™ offers the most complete Like-for-Like™ product offering and dimensional material list to the market leader.
