

Dear Family, Friends, and Loved Ones,

How can I say thanks for the things you have done for me. This celebration will never be forgotten and will always be cherished. Doris Fiddmont Frazier wishes to thank each of you for sharing this day with me and my family, and with each other.

Firstly, my grandson - Cliff III, for his desire to honor his grandmother and for realizing his dream of producing the documentary, "*Compositions of Life: Doris A. Frazier*". Secondly, I want to thank the event committee including Bertha Ewing, Kristi Frazier - Murdock, Danita Jackson, Irene Brown, and Cliff III, who worked very hard to plan and execute the great celebration you are witnessing right now. I would also like to thank all the participants, musicians, speakers, singers, emcees, ushers, and dancers. The event would not have been complete without you.

May I also submit a very special thanks to my pastor, Reverend Raymond Abernathy and the first lady, Tina Abernathy, the board of trustees, and all the members of Union Baptist Church of Chesterfield for encouraging the committee to go forward.

I would be remiss if I didn't include and recognize my husband - Clifford H. Frazier, Sr., my oldest daughter - Sherryl Jeannine Brown, my son - Clifford Jr.; my mom and dad - Rev. James E. and Lucy Fiddmont, my siblings, my entire family, and all of my friends, for their support and love while they were yet with us on this side of heaven. You all have made my life a wonderful blessing.

As I close, I want you to know that this celebration was a funeral presented live, and I am forever grateful to have been here to experience all the wonderful expressions of love, care, laughter, adoration, and joy while I yet live, move, and have my being.

I ask for your continued prayers, love, and kindness; and for your joy to continue to shine brightly, as I promise to keep shining in your lives.

My advice to all:

1. Keep a good attitude.
2. Love Life!
3. Always keep Christ in your life.

With Love and Appreciation,

*Doris Fiddmont Frazier*
