

Approach to Managing Location Data for Water Systems

Robert Rodriguez

Account Manager – Water, Wastewater, Stormwater

Challenges for Location Data Management

Location Strategy

Map where things are, show how they relate, determine what it all means, and evaluate what actions to take

Location Enablement

Discover, use, make, and share maps at work -- anywhere, anytime

Constituent Engagement

Facilitate and manage communication with stakeholders

Decision Support

Inform execs and management with maps and location intelligence

Field Mobility

Get authoritative information into and out of the field

Analytics

Describe, predict, and improve business performance

Location Data Management

Collect and organize location data about your assets and resources

ArcGIS Platform

► Making Mapping and Location Aware Apps Available Across your organization

Identity ▶ Your “key” to accessing the ArcGIS Platform wherever you are

ACCESS

SECURITIES

CAPABILITIES

Collaboration

▶ Enable people to work together by securely sharing data, apps, and knowledge
