

WASTEWATER & WATER OPERATOR CLASS 1, SE OH Job Description

QES Inc., based out of Belmont Ohio, provides contract operation for privately owned and small public water and wastewater treatment plants throughout the state of Ohio, Pennsylvania and West Virginia.

We are seeking a FULL-TIME candidate with a background in both operation and maintenance to operate and maintain these systems. PART TIME candidates will be considered. Candidate should live within approximately 1.5 hours from the Wheeling WV area. Hours are 7:00 am – 3:30 pm M-F. Overtime is often available and sometimes required. The position offers recession proof job security with opportunities for growth in a professional, team-oriented environment.

The work is generally outdoors although there is often considerable driving time to reach the sites. Up to several sites are visited each day by the operator. Some time is spent filing EPA reports, performing repairs, or purchasing and fabricating equipment. There is also considerable interaction with various treatment plant owners, maintenance personnel, and regulatory agencies.

The job candidate should have a minimum Ohio EPA Class I Wastewater and Ohio EPA Class 1 Water license. Candidates holding just one license will be considered.

The water / wastewater operator may perform the following tasks:

- Control and monitor the biological treatment process
- Operate pumps, motors, blowers
- Monitor flow meters
- Perform routine servicing and cleaning of plant, pipes, and equipment
- Monitor, operate, and troubleshoot electrical controls
- Take samples for analysis
- Perform laboratory analyses
- Prepare reports and logs detailing plant operation

Personal requirements:

- Physically fit
- Capable of working methodically and accurately
- Self-motivated and self-disciplined
- Creative and innovative

- Strong mechanical aptitude
- Good driving record
- Able to communicate with the public and co-workers as relating to work performed by some operators at QES, Inc:
- Construct water and wastewater treatment systems and pump stations
- Fabricate pumping systems and piping
- Fabricate electrical control panels
- Construct and maintain collection and distribution lines
- Drafting of systems and system components
