- Compliance Updates

U.S. EPA Initiative

U.S. EPA's (2018-2022) Strategic Plan identified a new priority to increase compliance with environmental laws.

Maximize compliance over the next five years by focusing on areas with significant noncompliance (SNC) issues.

U.S. EPA Initiative

U.S. EPA selected the Clean Water Act (CWA) - NPDES as the first program because states and U.S. EPA now have fairly complete compliance data for permitted facilities.

U.S. EPA Initiative

Reduce the national rate of NPDES Significant Non-Compliance (SNC) for individually permitted majors and non-majors (about 46,000 permittees) by 50% by Federal Fiscal Year (FFY) 2022

29.4% to 14.7%

U.S. EPA developed an Agency Priority Goal to reduce the SNC rate to 25.7% by September 30, 2019

What is Significant Noncompliance (SNC)?

- Failure to submit a discharge monitoring report
- Failure to meet a permit compliance schedule milestone
- Violations of formal enforcement actions
- Significant permit effluent violations

What is Significant Noncompliance (SNC)?

Permit effluent limit violations

- **Violations Exceeding Technical Review Criteria**

- 40% exceedance for conventional pollutants (e.g. BOD, TSS, ammonia, oil and grease)
- 20% exceedance for toxic pollutants (e.g. copper, cyanide, chlorine)

Trigger — Two or more months in a six-month period

- **Chronic violations: any monthly effluent limit by any amount**

Trigger — Four or more months in a six-month period

U.S. EPA Initiative

- In context of this new strategic priority to increase NPDES compliance, U.S. EPA will measure success based on the results obtained – the rate of permittees not in SNC.
- Increase the percentage of NPDES permittees not in SNC with their permit limits to 85% from a baseline of 71%.

This is an approach to measurement that states have consistently proposed to U.S. EPA.

U.S. EPA Initiative

U.S. EPA recognizes the role of authorized states in the NPDES program as the primary implementers and as critical players in the success of this effort.

The goal of increasing the compliance rate for this program can be achieved only with substantial, collaborative effort on the part of the states and U.S. EPA working together.

Accordingly, U.S. EPA has engaged states in developing tools and approaches for increasing compliance rates in the NPDES program.

U.S. EPA Initiative

Transition from National Enforcement Initiative (NEI) to National Compliance Initiative (NCI)

The name is being changed to convey the message that increased compliance is the goal and enforcement actions are not the only tool for achieving this goal.

U.S. EPA Initiative

In the transition to NCIs, U.S. EPA wants to engage more fully with the states and enhance the full range of compliance assurance tools.

U.S. EPA Initiative

U.S. EPA plans to meet quarterly with states to discuss:

- The SNC rate and direction of the rate (is it going down?)
- The root cause of the SNC and strategies to reduce the rate
- The most serious SNC violators and how they will be addressed
- Discussion of NPDES compliance data completeness/ data quality issues

U.S. EPA Initiative

- SNC Steering Committee Activities:
 - ✓ Completed two EPA-State SNC NCI Symposiums

There are four SNC subgroups that meet monthly:

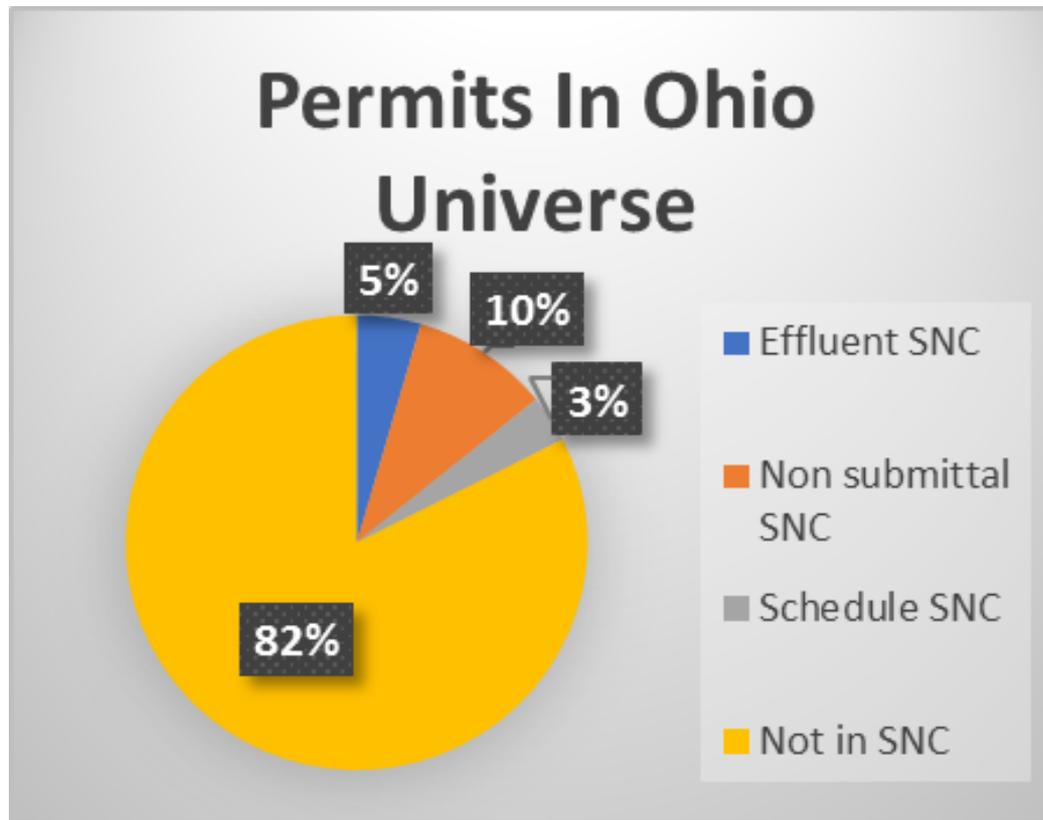

1. Data Quality & DMR Non-Receipt
2. Effluent Violation Deterrence
3. Communications and outreach
4. Federal Facilities

Ohio SNC

State	Permits in SNC	Permit Universe	% SNC Rate	Effluent Violations	Schedule Violations	Non Receipt DMRs
OHIO	569	3,245	17.5	146	109	314
Region 5	1,110	8,023	13.8	368	155	584

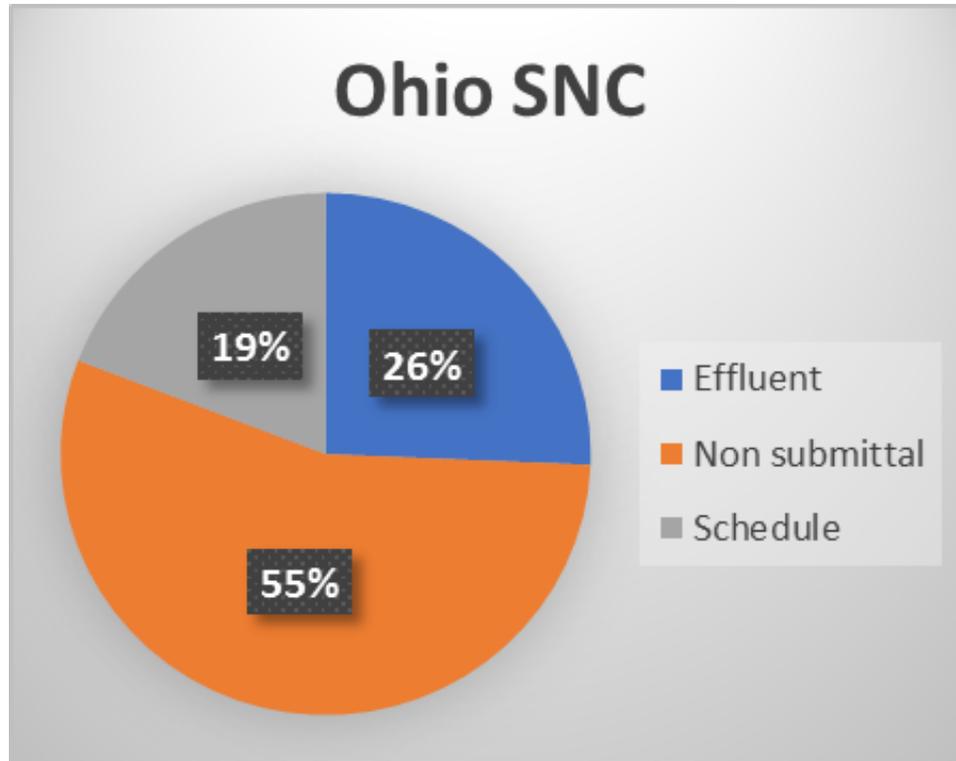

Ohio has 40% of the permit universe in all of Region 5
(Region 5 consists of: Ohio, Indiana, Illinois, Michigan, Wisconsin, and Minnesota)

Ohio SNC

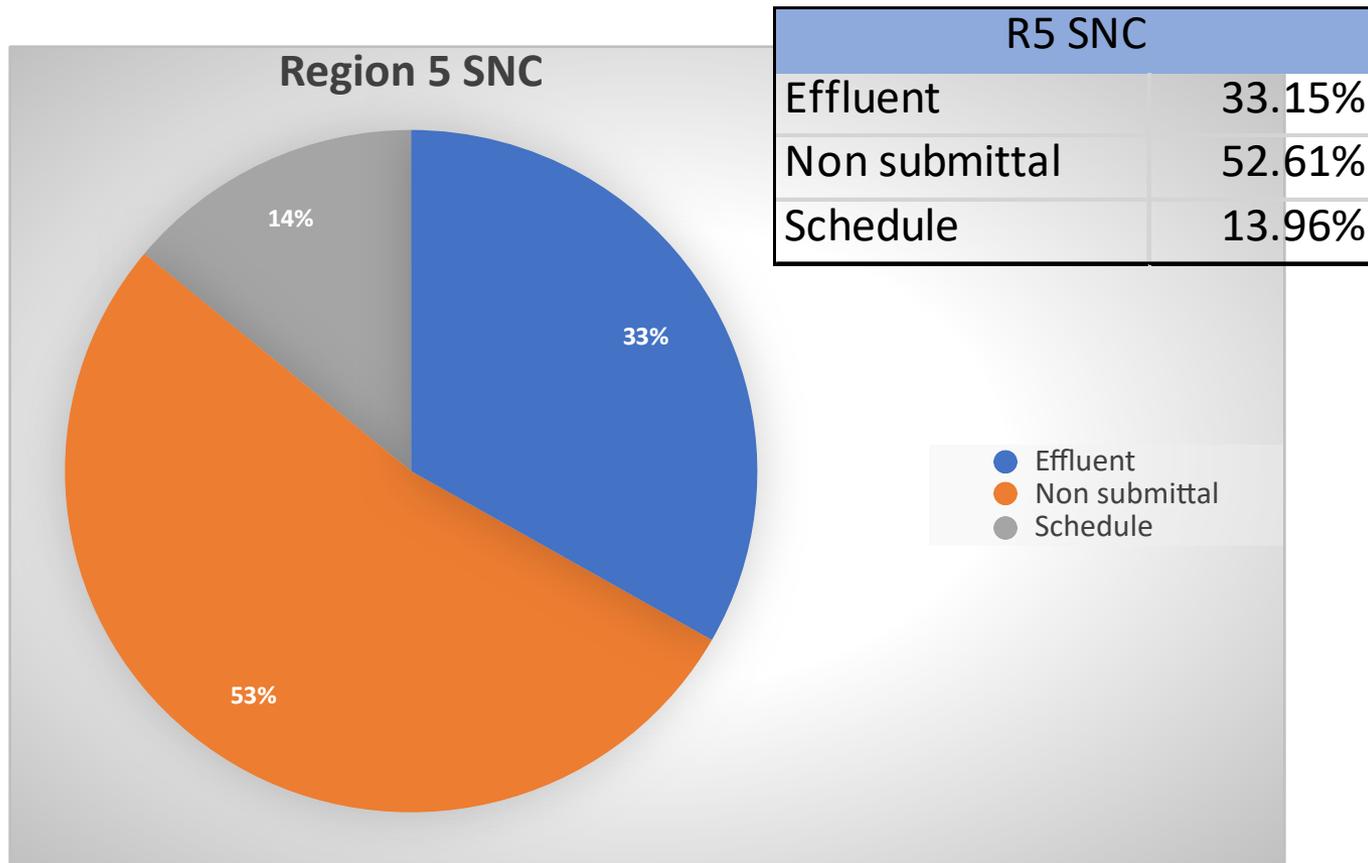

Permits in Ohio Universe	
Effluent SNC	4.50%
Non submittal SNC	9.68%
Schedule SNC	3.36%
Not in SNC	82.47%

Ohio SNC

Ohio SNC	
Effluent	25.66%
Non submittal	55.18%
Schedule	19.16%

Ohio SNC

Ohio SNC

Common reasons for noncompliance:

1) The operator doesn't understand principles of wastewater treatment

we can train the operator

2) The design is deficient

we can figure out work arounds

3) The administration doesn't support the operator needs

this is what enforcement is for...

Ohio SNC

Common attitudes of operators/owners:

“I don’t give a _____ !”

“It costs too much!”

“We’ve tried everything!”

“well, maybe enforcement”

“compliance is cheaper”

It is possible to work with ~~these attitudes~~ “these attitudes”.

Ohio SNC

- **What are the issues leading to SNC?**

Big Picture

Types of violations, facilities, locations

Broad outreach

Big Picture

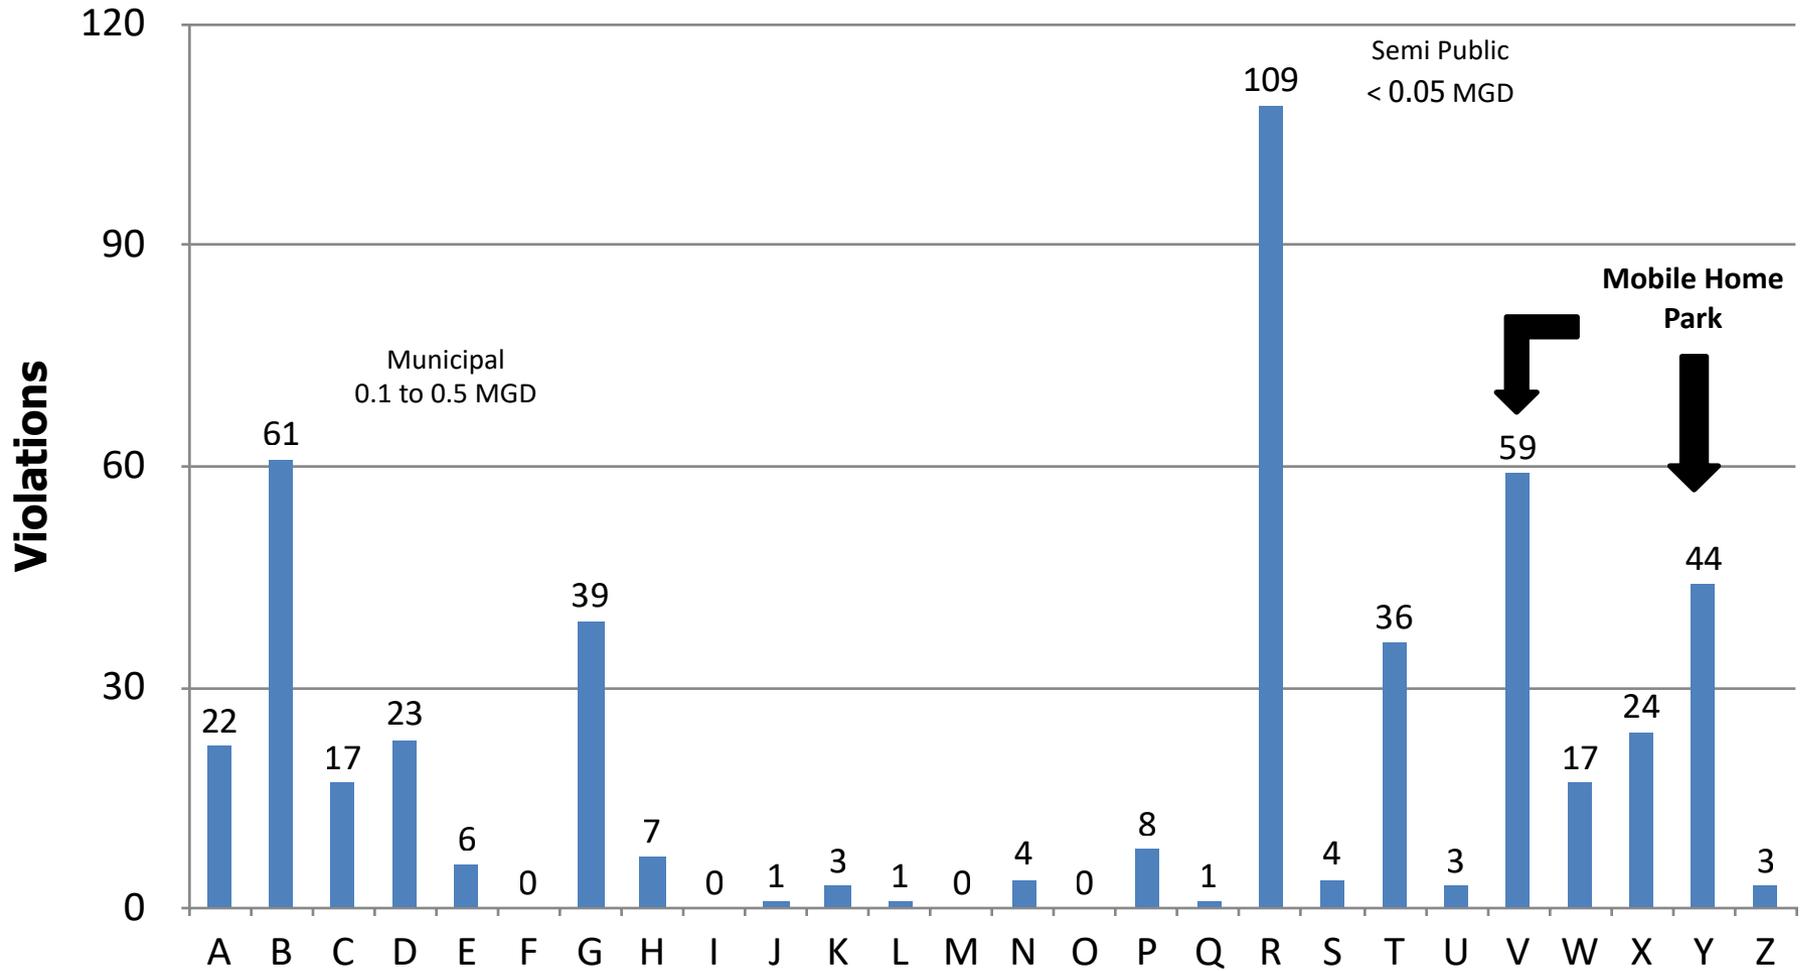

Review of SNC data

What are the problems?

Where are the problems?

What is the most effective solution?

Type Facility SNC April - October

Ohio SNC

Type "R" Semi Public < 0.05 MGD

Who are they?

4-H/FFA camps

Restaurants

Marinas

Schools

Small Manufacturing

Motels

Bars/Taverns

Churches

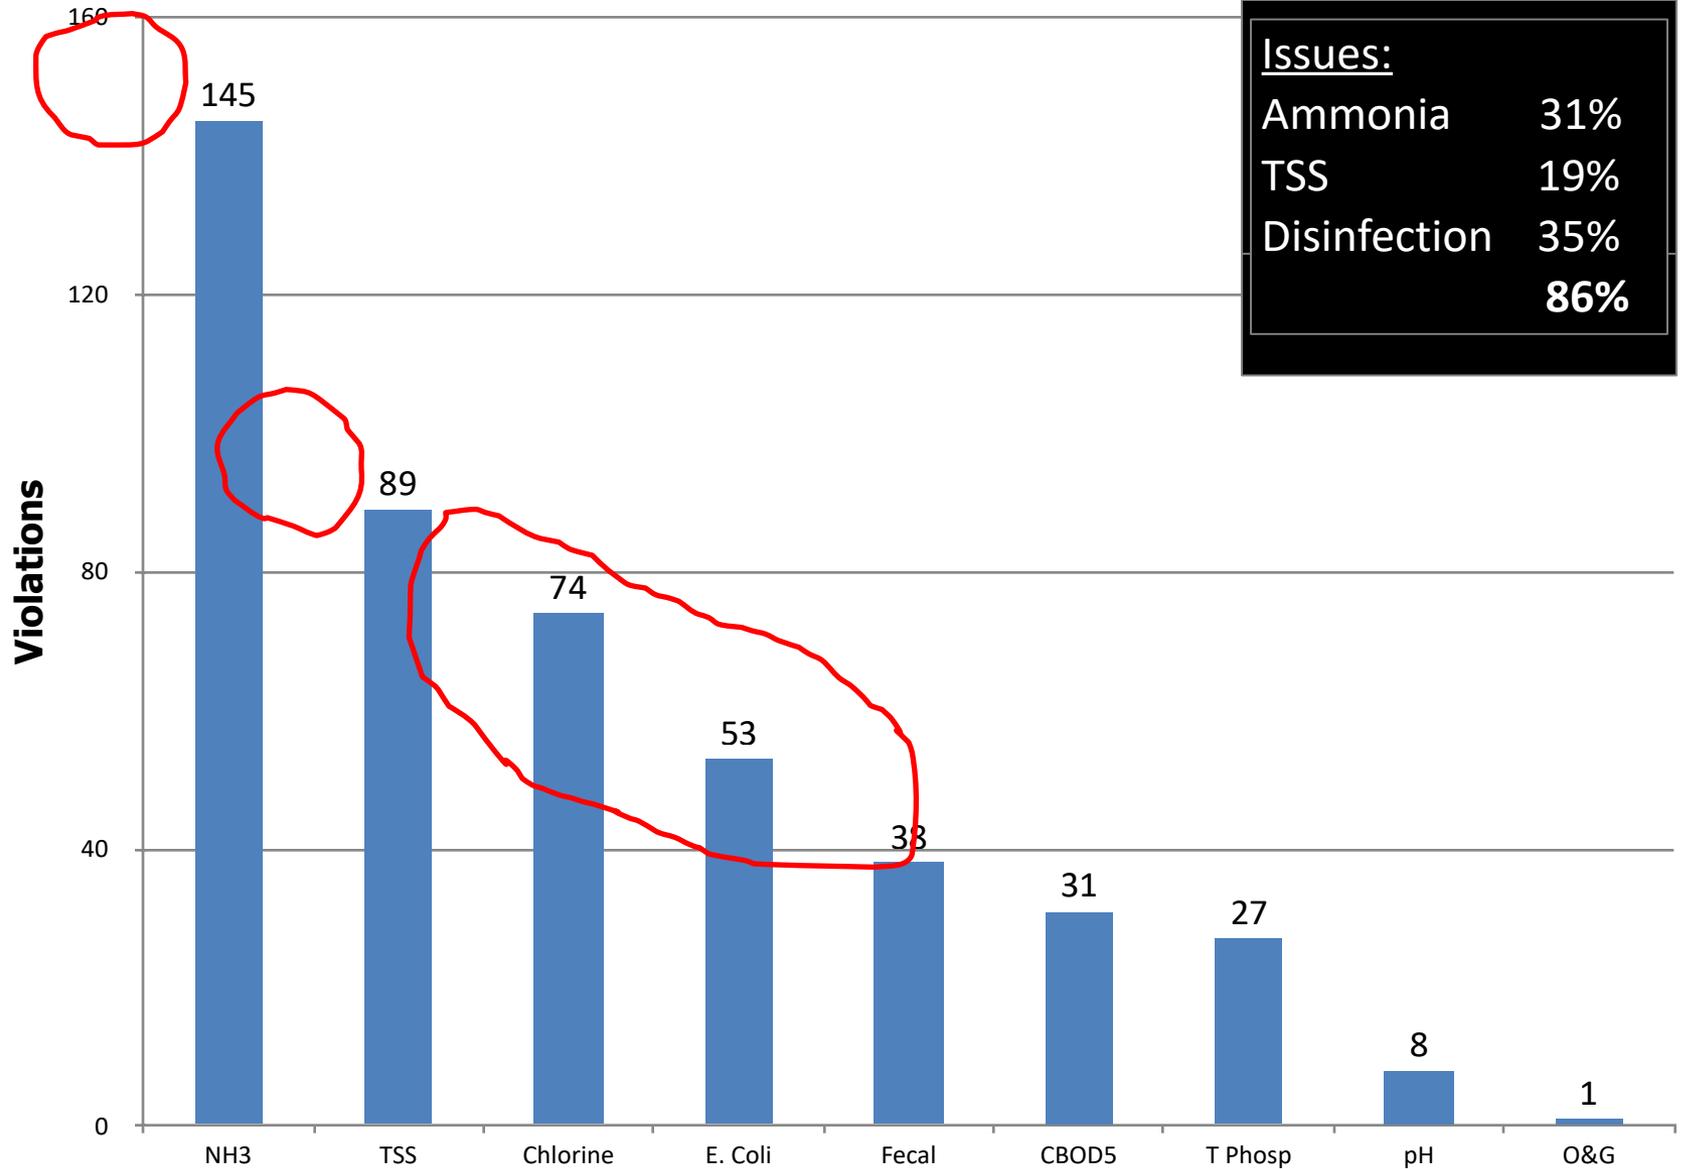

Might require more "hand holding"

Ohio SNC

Type "R" Semi Public < 0.05 MGD

What are their issues?

SNC April - October

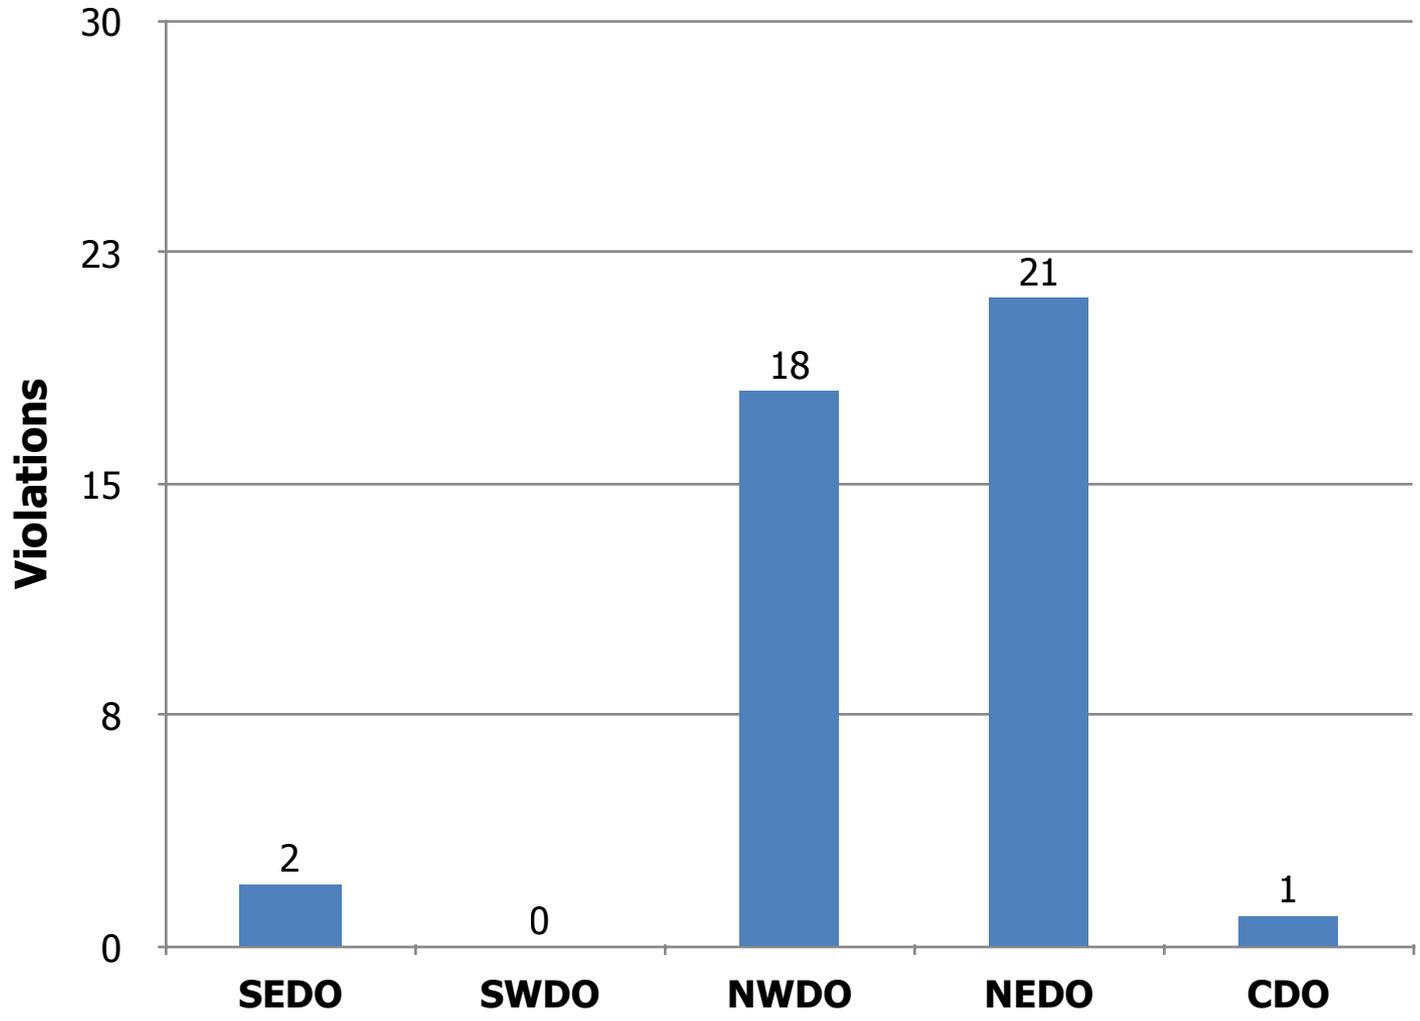

Issues:	
Ammonia	31%
TSS	19%
Disinfection	35%
	86%

Ohio SNC

Type "R" Semi Public < 0.05 MGD

Where are they?

Semi Public < 0.05 MGD NH3-N violations by district

Compliance updates

Single Event Violations (SEV's)

These are violations observed during an inspection

- Unapproved bypass
- Unauthorized discharge
- Effluent violation resulting in a fish kill
- Violation of a milestone in an administrative order

Compliance updates

USEPA is requiring Ohio to capture these SEV's and upload them into the national database. As part of Ohio's routine upload.

Some of these violations could be considered SNC

Your facility could be shown as a facility in SNC in the Enforcement and Compliance History Online (ECHO)
