

Evaluation of ultrasound for cyanobacterial harmful algal bloom control

Linda Weavers, Department of Civil, Environmental and Geodetic Engineering

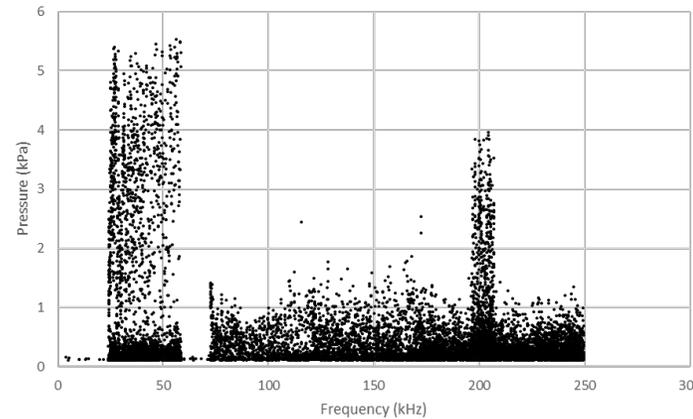

OTCO Reservoir Management Workshop Webinar
July 12, 2022

Conclusion: Gas Vesicle Collapse is not occurring

Future Work: Could other mechanisms be at play?

If you are interested in details of this presentation, contact Linda Weavers, weavers.1@osu.edu or 614 292-4061

Future Work: Connecting with users of ultrasound for reservoir management

Goals:

- measure ultrasound to ensure ultrasound is functioning
- with sonde, link water quality to performance
- interact with users to find possible modes of action of ultrasound
