
EQUITERR

THE IDEAL FOOTING STABILIZATION SYSTEM

Equiterr is a modular matting product engineered for the equestrian industry. It is key to our footing stabilization system for arenas, training areas paddocks and stalls. This system creates a stable, porous base for your footing material by combining the strength of a stone aggregate base with the stabilizing characteristics of the Equiterr layer. The system increases soil stability and enhances footing drainage. It is also the ideal solution for improving muddy, rutted soil conditions around gates, along fence rows and barn access areas.

Equiterr's unique system design allows for year- round utilization and enjoyment of your riding and training facilities.

Applications

- Arenas
- Training Areas
- Jump Areas
- Paddocks
- Turnouts
- Stalls
- Gates
- Emergency Access Roads
- Erosion Control
- Fire Lanes
- Overflow Parking
- RV Pads
- Service Roads
- Stormwater Management

KDeb Mfg Inc.

Features

Specifications for CSI 02795 Porous Paving

Product

Minimum 97% post-consumer recycled, reinforced high-density Polyethylene (HDPE). Maximum 3% UV stabilizations and coloring.

Material Dimensions

19-3/4" x 15-1/4" x 1-3/4"
2.14 sf
50 x 39 x 4.5 cm
5 pieces = 1 meter sq.

Design

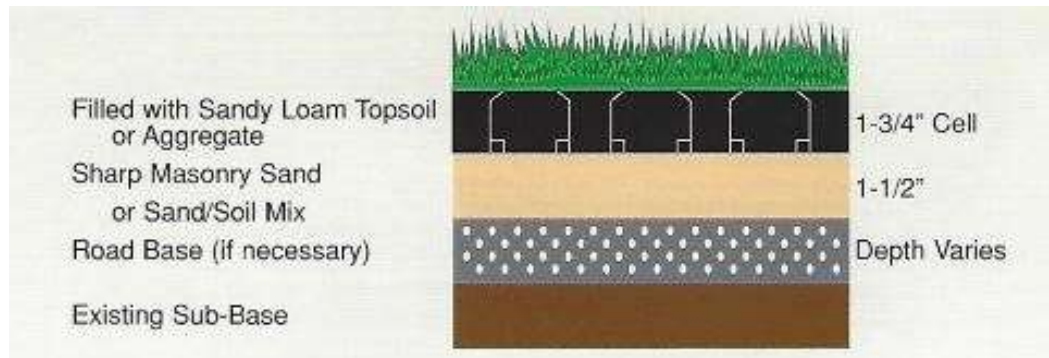

Hexagon Cells each 2-1/8" x 2-3/8" with 1-5/16" base opening and 1/2" perimeter openings (horizontal and vertical drainage)

1/8" cell wall and base thickness (strength in design not fill)

Weight: 2.4 lbs. / panel

Color: Black
