Geothermal Power Plant Investors Association (JESDER) was established in 2014 and started to work in 2015. JESDER is represent 31 leader companies which are owners of EMRA Production License. The main objective is reach to international standart at the geothermal energy sector. In addition that; researching new geothermal resources and establishing power plant from these sources; also support cooperation between public and private sector organizations.

The goals of the congress are to bring together engineers, scientists, investors and related ministry/public employees (Energy, Environment, EMRA, etc.); provide a forum for the exchange of ideas on the geothermal resources exploration and development, legislation and feed-in tariff and energy storage (main topic) ; and to enable prompt and open reporting of progress.

We strongly encourage all investors, scientists and engineers involved in geothermal industry to attend the congress. We are honored to see you among us.

Regards.

Ali KINDAP
President
