

Aluminum Floating Dock Hardware

Light Weight | Will Not Rust | Extruded Strong

Chain Corner Attachment (46-643)
Attached to Corner Bracket.
Reinforces corner and creates anchor location.

Floating Dock Connector (46-486)
Use with Anchor & Chain to stabilize your dock.

Float Bracket (46-607)
Use to firmly attach floats to dock frame.
An upgrade from standard lag bolts.

Brace Attachment (46-586)
Attaches to Plain Corner to make a reinforced corner.
Use when your dock needs to be built strong.

Stringer Bracket (46-810)
Use to hold together the internal structure of your dock.

Backer Plate (46-583)
Use in place of washers for a more sturdy dock.
Also used to align pole dock hinges.

Floating Dock Hinge (46-583)
Use in place of washers for a more sturdy dock.
Also used to align pole dock hinges.

Flat Chain Retainer (46-644)
Hangs below the dock frame for easy access.
Great for frequent water level changes.
