

Wöhner CrossBoard®

Safe

The consistent front and rear touch-safe protection according to IP20 offers a high level of safety that enables the creation of a power distribution system in accordance with standards DIN EN IEC 61439 and UL 508.

Simple

The components are snapped onto the **CrossBoard®** without the use of tools; the connection is thereby established automatically. The integrated reverse polarity protection prevents errors during mounting. The simple plug-in mounting is also suitable for automated assembly.

Fast

The **CrossBoard®** is a complete, out-of-the-box system that saves users a great deal of time when it comes to mounting: Simply unpack, mount in a single step and immediately start plugging in the components.
