

System 30Compact, 3-Pole[®]

Advantages of the system

- For compact control and distribution panels
- Number of components is kept to a minimum
- Many 60Classic components can be used here as well

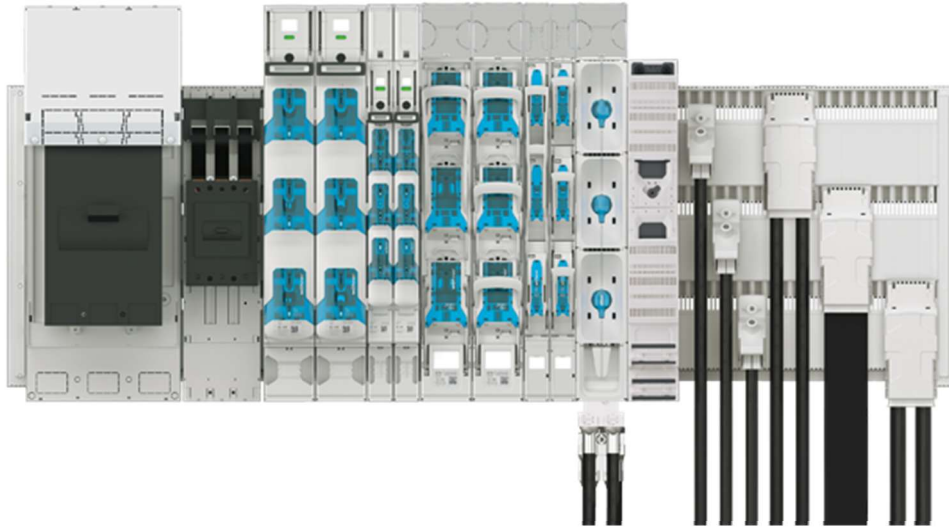

System 30Compact, 5-Pole[®]

Advantages of the system

- developed for its use with MCBs
- wide variety of combinations possible with a few modular components

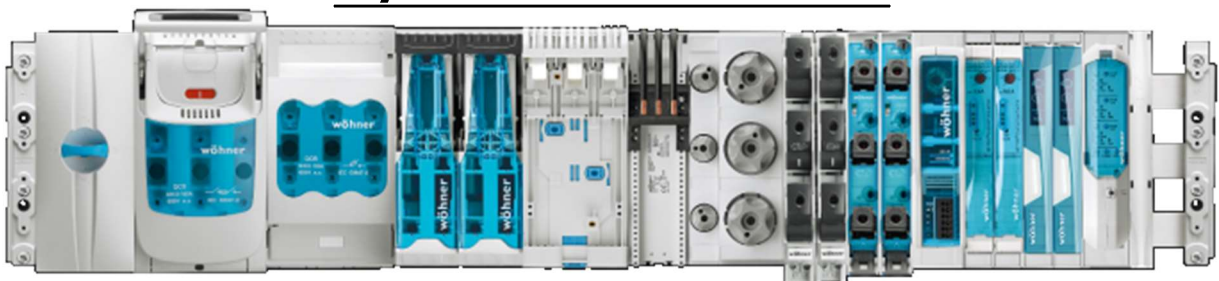

System 185Power[®]

Advantages of the system

- new, space-saving solution for proven technology
- complete protection of the system against accidental contact is possible
- comfortable and safe mounting of the components
- different technical solutions possible on the same system
- adapters for circuit breakers up to 1600 A

System 60Classic[®]

Advantages of the system

- large current range of the system thanks to the use of different busbars
- safe, space saving and clearly arranged in its design
- wide range of components
- many of the components comply with UL 508 requirements
