MID RANGE DISTANCE SENSORS- Dx35

SICK Time Of Flight Sensors

1057651

Benefits

- Voltage: DC 12 V - 30 V
- Precise and reliable measurement irrespective of object color extends running times and process quality
- A compact size and blind zone make flexible mounting possible when space is limited
- Optimum solution thanks to flexible settings for speed, range and repeatability
- Flexible interface use: 4 mA to 20 mA, 0 V to 10 V, current sourcing output, current sinking output, or IO-Link – making machine integration simple
 - With their straightforward alignment, optimal performance or inconspicuous measurement, versatile light senders make for an ideal solution in all scenarios
- Low investment costs and high performance levels guarantee a short return on investment
 - IO-Link offers full process control, from commissioning through to service
- DT35-S - Certification up to performance level b allows versatile use for protecting persons and capital goods
