

LET'S TALK ABOUT FRACTIONS

This Week's Round Up!!

This week I talked about how to introduce fractions to your child. This begins in the third grade! At first you start out by showing equal parts- this can be done by splitting shapes into equal and non-equal parts to show the difference. A fun way to do this is with Play Doh! Once your child understands that they can move onto understanding $\frac{1}{2}$ - $\frac{1}{8}$! A fun way to show this is through baking!!! Last, you move onto equivalent fractions. Check out my instagram page @mrsplayerspupils for some fun hands on activities to teach this skill to your child!

FRACTION VOCABULARY WORDS

DENOMINATOR- BOTTOM NUMBER IN A FRACTION.

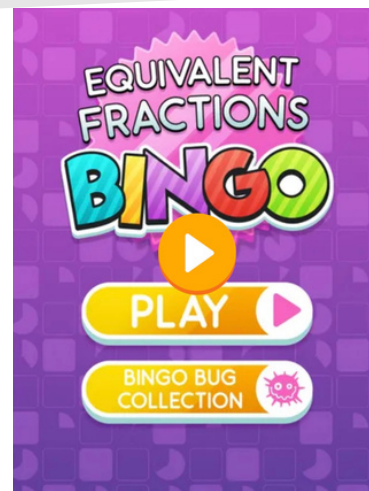

NUMERATOR-TOP NUMBER IN A FRACTION.

EQUIVALENT- EQUAL
