

LET'S TALK ABOUT MULTIPLICATION!

This Week's Round Up!!

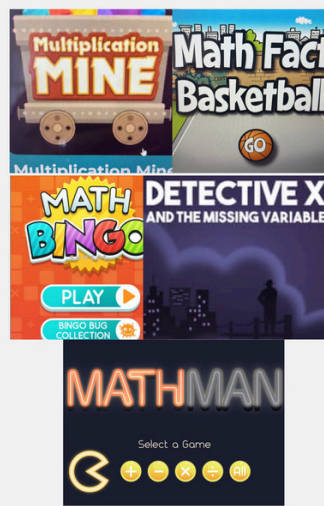

Hi! I'm Player Waldron---a former teacher turned full time tutor and proud owner of Mrs. Player's Pupils Online Tutoring Company. From EC to regular education, kindergarten to high school, I have done it all! One of the biggest struggles I see among my upper elementary and middle school students is multiplication; but know that they can go ahead and start working on foundational skills of multiplication as early as first grade! These include having your child learn how to skip count by 2's, 5's, and 10's! Use visuals at the beginning, then begin to phase them out as your child's skills improve!

*SKIP COUNTING DOESNT HAVE TO BE BORING!!! MAKE IT A GAME! HAVE YOUR CHILD FIND MATCHING ITEMS AROUND THE HOUSE THEN PUT INTO GROUPS TO COUNT!!!

Best Way to Memorize

Your child should know their facts up to 12. Start with one number and once that's memorized move to the next while mixing in the memorized facts occasionally!
