Aspen Collection — 58 oz Solution-Dyed Polyester

- High-density premium carpet
- Upgraded cushion pad
- Best seam placement & finish

- Premium metal transitions included

Best for: pets, kids, high-traffic homes.

How to Measure Your Space for Carpet

Carpet is manufactured in 12-foot-wide rolls. This affects how much material is required.

Measure the longest wall and the shortest wall of the room.

Divide the shortest wall by 12 to determine how many carpet cuts are needed.

Always round up to the next whole number.

Example: Room size 15 ft × 18 ft.

$15 \div 12 = 1.25 \rightarrow$ requires 2 cuts.

Worst-case estimate: $12 \times 18 \times 2 = 432$ sq ft.

This method provides a worst-case estimate for budgeting. Professional seam planning often reduces final material required.

Quick Cost Estimator (Budget Estimate Only)

Estimate square footage using the method above, then multiply by your selected package price to get a rough project cost. This does not include optional services.

Estimated Square Footage	_____
Selected Package (circle)	Basic Comfort Premium
Estimated Project Cost	_____

Optional Installation Services (When Required)

Service	Rate
Demolition & Removal	\$1.00 / sq ft (Min \$100)
Premium Metal Transitions	Priced per opening
Pad Upgrade	Priced per sq ft
Stairs	\$25 per stair + material
Kilz / Subfloor Sealing	\$1.00 / sq ft (Min \$100)
Carpet Re-Stretching	\$200 per room
Moving Furniture	\$75 per room (Min \$250)
Seam Repair	\$150 doorway / \$300 field
Patch Repair	\$125 per patch (12x12 max)
