ADP® Professional Services

Technical Optimization

Offered by

Callisto Technology LLC.
BUSINESS SOLUTIONS AND SERVICES BEYOND THE CLOUD

You've invested in ADP Workforce Now® to help your HR team be more efficient and create an employer-of-choice environment – but are you maximizing your investment?

With the ADP Professional Services Technical Optimization package, we'll help you find ways to better utilize your technology through automation. Our subject matter experts will review the applications and dataflows in your ecosystem so that the best-of-breed technology that you chose is leveraged to help you save time, reduce manual effort and improve the overall quality in your organization. We will also:

	Identify critical ecosystem applications, dataflows and how they are used, such as:		**Research each application identified and determine its integration capabilities, such as:**

	• Accounting • Payroll
	• Benefits • Staffing
	• ERP • Talent
	• HR • Time
			• Technology available
			  o API
			  o File Import/Export
			• Integration tool exists or needs to be built

	Analyze and recommend optimization opportunities • Analyze the data gathered in the identification and research steps • Based on the analysis, define recommendations for optimizing the technology spend by reducing manual tasks and increasing quality.		**Document all research and recommendations** • Systems Inventory • Data Flows • Pain Points • Recommendations

So whether your organization has experienced a recent addition to its technology ecosystem or you just want to better understand the tools you have and how to leverage them, ADP's Professional Services consultants are here to help you optimize your system, increasing your likelihood of receiving a better return on investment.
